CENTRAL PATTANA

CPN TB

ENTRAL PATTANA CPN I

THAILAND / PROPERTY DEVELOPMENT

- Two new malls and three new residences opened in 1Q24.
- Expect a record quarterly profit of THB4.2b in 1Q24 (+6.1% q-q, +30.0% y-y).
- Reiterate our BUY call and TP of THB83.

Expect a record profit in 1Q24

We expect CPN to register a record quarterly profit of THB4.2b in 1Q24 (+6.1% q-q, +30.0% y-y). The q-q increase should result mainly from lower SG&A expenses after its typical high in 4Q, while the y-y jump would come chiefly from continued revenue improvement across all businesses. CPN's retail malls remained resilient, with a remarkable foot traffic of 96%, impressively improving from 91% in 4Q23.

Two new malls and three new residences opened in 1Q24

During the quarter, CPN opened Central Nakhon Sawan on 31 January and Central Nakhon Pathom on 30 March, making 42 shopping malls under management with a total NLA of 2.3m SQM. It also launched three new residential projects in Bangkok, Nakhon Sawan, and Nakhon Pathom, worth THB3.7b. We project 1Q24 total revenue of THB11.7b (-8.7% q-q, +17.5% y-y). Due to a seasonal pattern, revenue should decline q-q in all businesses, especially residential property, which booked almost 40% of its 2023 revenue in 4Q23.

Expenses to decline from season high in 4Q23

The 1Q24 blended gross margin should remain high at 54.9%, slightly down from 4Q23 on higher depreciation costs from the new malls. We expect SG&A expenses to drop from the festive season in 4Q23 to its normalized level of around THB1.7b each quarter. Interest expenses may jump 50% y-y due to the interest rate upcycle in 2023, making the company's average cost of funds spike to 3.0% in 1Q24 from 2.2% in 1Q23.

Reiterate our BUY call and TP of THB83

The projected 1Q24 profit accounts for 27% of our full-year forecast. Since the outlook remains intact, we reiterate our BUY call and DCF-based TP of THB83 (WACC 7.4%, LTG 3%). It implies 23.5x 2024E P/E while CPN trades at only 17.5x 2024E P/E.

Investment thesis

Although we estimate CPN's earnings growth to be slower in 2024, the company's long-term fundamentals are still solid, with a visible plan to maintain its leadership in the retail property sector in Thailand.

We expect CPN to register a record quarterly profit of THB4.2b in 1Q24 (+6.1% q-q, +30.0% y-y). The q-q increase should result mainly from lower SG&A expenses after its typical high in 4Q, while the y-y rise would come chiefly from continued revenue improvement across all businesses. CPN's retail malls remained resilient, with a remarkable foot traffic of 96%, impressively improving from 91% in 4Q23.

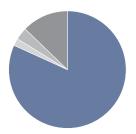

Company profile

Central Pattana PCL is the largest retail property developer in Thailand, with over 40 years of experience. At end-3Q23, CPN managed 38 shopping centers, 17 community malls, one super-regional mall in Malaysia, 10 office buildings, eight hotels, and 27 residential projects. It has a net retail leasable area of 2.3m sqm., with an average 90% occupancy rate.

www.centralpattana.co.th

Principal activities (revenue, 2023)

- Revenue from rent and services -81.8 %
- Revenue from food and beverage 2.0 %
- Revenue from hotel operation 3.4 %
- Revenue from residential project -12 8 %

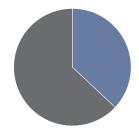

Source: Central Pattana

Major shareholders

■ Chirathivat Family - 37.0 %

■ Others - 63.0 %

Source: Central Pattana

Catalysts

Key potential catalysts include 1) NLA expansions with new shopping malls; 2) effective cost control or the ability to pass through increased costs to tenants; and 3) the success of its housing projects.

Risks to our call

Key downside risks to our DCF-derived TP are deviations from our estimates on rental and occupancy rates, returns on its new investments, capex, and interest rates.

Event calendar

Earnings sensitivity

- For every 5% increase in rental rate, we project 2024 earnings to rise by 3%, and vice versa, all else being equal.
- For every 1% increase in occupancy rate, we project 2024 earnings to rise by 1%, and vice versa, all else being equal.
- For every 1% increase in SG&A to sales, we project 2024 earnings to drop by 2.8%, and vice versa, all else being equal.

Central Pattana PCL (CPN TB)

Exhibit 4: FSSIA ESG score implication

81.38 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 29-Apr-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
