## EQUITY RESEARCH - COMPANY REPORT

# SCGJWD LOGISTICS

THAILAND / TRANSPORT & LOGISTICS

## Expect a soft start in 1Q24

- Expect core profit to decrease 10% q-q, mainly from soft revenue from automotive and cold chain units.
- Higher equity income from new investment should partially compensate for high SG&A expenses.
- Reiterate our BUY call and TP of THB23.

## Expect a soft start in 1Q24

We expect SJWD's total revenue to slightly decline by 3% q-q to THB6.1b, mainly from its automotive and cold chain units. Automotive yard management, one of SJWD's crown jewels, might see a soft start in the first quarter. The Motor Show 2024, held during the last week of March, made consumers delay purchase decisions as they waited for promotions. Also, Chinese New Year temporarily affected the cold storage demand for poultry products. On the other hand, the transportation unit could see an improvement after hard work.

## Higher equity income should compensate for high SG&A

We estimate a gross margin of 14.3%, slightly below 14.7% in 4Q23, owing to soft revenue and more contribution from the low-margin transportation business. The SG&A expense-to-sales ratio is anticipated to remain high at 9.2%, resulting from consulting fees related to the ongoing M&A target identification. However, this should be somewhat compensated by the new investments in a 20.1% stake in Asia Network International (ANI TB) since February 2024 and a 20.4% interest in Swift Haulage Berhad, Malaysia (SWIFT MK) since mid-March 2024. We anticipate total equity income to rise 81% q-q to THB78m in 1Q24.

## Maintain our projection

As a result, we expect a core profit of THB241m in 1Q24 (-10% q-q, +4% y-y), accounting for 20% of our full-year forecast of THB1.2b (+28% y-y). Note that the company has a potential gain from asset sales to REIT in 3Q24. We maintain our profit growth projection of 14% CAGR during 2024-26, surpassing revenue growth of 9% CAGR due to margin expansion and cost efficiency.

## **Reiterate our BUY call and TP of THB23**

We retain our BUY call and TP of THB23 (DCF, WACC 9.2%, TFG 3%), premised on an implied P/E of 35x in 2024E and 27x in 2026E. SJWD's share price is currently trading on undemanding valuations of 24x 2024E P/E, below its five-year historical average P/E of 27x, and only 12x 2024E EV/EBITDA. We reiterate our BUY call on SJWD.

#### **Investment thesis**

Post-merger with SCGL in 2023, we anticipate 2024-26 profit growth of 14% CAGR, mainly from margin expansion and well-controlled expenses. We maintain our DCF-based TP at THB23, premised on an implied 2024E P/E of 35x or 27x in 2026E. SJWD is trading on undemanding valuations of 24x 2024E P/E, below its five-year historical average P/E of 27x, and only 12x 2024E EV/EBITDA. We reiterate our BUY call on SJWD.

## **Company profile**

SJWD commenced its logistics business in 1979 and is now one of ASEAN's top specialized logistics and supply chain solutions providers. A win-win merger with SCG Logistics Management Co., Ltd. (SCGL), the logistics arm of Siam Cement Group (SCG), makes SJWD the largest integrated service provider in ASEAN-9 including Southern China.

## Catalysts

Potential catalysts for SJWD include 1) a fast recovery in freight rates; 2) a strong recovery in Thailand's and the region's exports; and 3) booming EV demand in Thailand.

## Risks to our call

Downside risks to our DCF-based TP include 1) slower-thanexpected regional economic growth; 2) high volatility in energy costs; 3) delayed synergies; and 4) higher cost of funds.

## **RECOMMENDATION STRUCTURE**

#### **Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
