**EQUITY RESEARCH - ANALYST MEETING** 

THAILAND / FOOD & BEVERAGE

## Key takeaways from analyst meeting

#### **TARGET PRICE** THB44.00 CLOSE THB32.25 **UP/DOWNSIDE** +36.4% **TP vs CONSENSUS** +9.6%

### **Highlights**

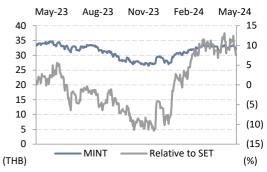

- We have slightly positive feedback from MINT's 1Q24 analyst
- Strong operations are likely to continue in 2Q24. RevPAR of European hotels grew by 9% y-y in April (vs 13% y-y in 1Q24), and MINT expects it to grow by 10% y-y in May. Management expects the B2B segment to be the key driver this year, coupled with major events in Europe including the 2024 Summer Olympics, UEFA Euro 2024 and Taylor Swift and Cold Play concerts.
- Operations in Thailand have remained strong. Thai hotel RevPAR grew by 7% y-y in April (vs 25% y-y in 1Q24). Meanwhile, SSS of Thai restaurants grew by 2% in April (vs 1.8% in 1Q24), driven by strong performances from Swensen, Sizzler and Dairy Queen.
- IBD slightly increased to THB104b in 1Q24 (vs THB103b in 4Q23) mainly due to fluctuations in FX. Management still expects to deleverage and estimates the net IBD/E to decline to 0.8x (vs 0.98x in 1Q24).
- SSS of the China hub plunged by 27% y-y in 1Q24 due to the high base in 1Q23 (first period of reopening). MINT expects the situation to improve premised on a stimulus package from the Chinese government. In addition, MINT recently launched a new fish platform brand named Jiang Mei Xian as well as a new flavor for a grilled fish platform to capture a larger proportion of the family segment. Note that despite the weak SSSG in the China hub, the food business' core profit jumped by 29% y-y to THB0.6b in 1Q24 thanks to higher revenue flow-through, improved cost management and lower raw material prices in China.

### Recommendation

- We expect core profit to hit a new record high in 2Q24 (vs current record high of THB3.0b in 2Q23) thanks to the promising RevPAR of European hotels.
- MINT is trading at an attractive valuation of 22x 2024E P/E compared to its five-year average of 25x and global hotel peers' average of 28x.

### **Exhibit 2: FSSIA ESG score implication**

84.43 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
****	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

### **Additional Disclosures**

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 20-May-2024 unless otherwise stated.

### RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### **Industry Recommendations**

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

#### **Country (Strategy) Recommendations**

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
