UP/DOWNSIDE	+14.5%
TP vs CONSENSUS	-7.9%

Key takeaways from analyst meeting

Highlights

- We have a neutral view of the meeting yesterday. 2QTD presales amounted to THB6b (60% low-rises and 40% condos), already equal to 63% of 1Q24 presales of THB9.5b, driven mainly by high-end detached housing projects, a segment with high purchasing power, launched in 4Q23-1Q24. Also, SIRI introduced more new projects and expanded them to popular tourist destinations. The solid presales signaled a continued recovery of international demand, as seen in higher international presales of 20% in 2QTD, up from 15% and 10% of total presales in 1Q24 and 4Q23, respectively. Therefore, we initially predicted that 2Q24 presales would edge up q-q and stabilize y-y at THB10b.
- SIRI plans to introduce 11 new projects with a combined value of THB12b (+136% q-q, -23% y-y) in 2Q24, comprising five low-rises (THB4.3b mainly in the mid-end market) and six condos (THB8b). The highlight is The Standard Residences Hua Hin (THB4.7b, selling price THB270,000/SQM), which has great appeal in its Residences brand and its prime location on Hua Hin beach. It has garnered 15% presales and will begin transfers in late 2025.
- We expect 2Q24 core profit to weaken y-y due to a high base but stabilize q-q, supported by the start of transfers for two new condos, i.e., The Base Height-Chiang Mai (THB2b, 57% presales) and a JV project (The Line Vibe, THB4b, 59% presales). Also, SIRI would begin transfers of low-rise projects introduced in 4Q23-1Q24. Although the competition is high, the main portfolio, i.e., high-end low-rises, is less price-sensitive than low-end ones. Hence, we anticipate a gross margin of 34-35%. However, the 2Q24 net profit should decrease q-q and y-y due to an extra gain from land sales in 1Q24 and 2Q23.
- SIRI had a THB15b backlog. It would realize THB8.3b as revenue in 2024, securing 58% of our 2024E transfers. Also, the transfer and mortgage fee cut to 0.01% for residential units under THB7m, representing 53% of the backlog, would help smooth transfers and limit downsides.
- We maintain our 2024E core profit of THB4.7b (flat y-y) and our TP of THB1.90 (PER 7x). Since it offers an upside of over 10%, we retain a BUY call. In the short term, the 2Q24 profit outlook is unexciting. However, the 2H24 profit should improve h-h due to a full-quarter realization of The Line Vibe condo in 3Q24, seven more newly-built condos, and the introduction of several low-rises in 4Q24.

Exhibit 8: FSSIA ESG score implication

66.14 /100

Rating	Score	Implication
****	>79-100	Leading its industry peers in managing the most significant ESG risks which not only better cost efficiency but also lead to higher profitability.
***	>59-79	A mixed track record of managing the most significant ESG risks and opportunities relative to industry peers.
***	>39-59	Relevant ESG materiality matrix has been constructively addressed, well-managed and incorporated into day-to-day operations, in which targets and achievements are evaluated annually.
**	>19-39	Relevant ESG materiality matrix has been identified with key management in charge for progress to be followed up on and to provide intensive disclosure. Most targets are conventional and achievable.
*	1-19	The company has adopted the United Nations Sustainable Development Goals (UN SDGs), established sustainability management guidelines and fully complies with regulations or ESG suggested guidance from related organizations such as the SET and SEC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited.

All share prices are as at market close on 20-May-2024 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
