Entry into data centre venture

Entry into a data centre venture

On 1 October 2021, GULF announced two events that should positively impact its share price. First, it announced a memorandum of understanding (MOU) with Singapore Telecommunications Limited (Singtel) to jointly study the feasibility for the development of a data centre business in Thailand with the intention to form a partnership whereby each party holds a 50% equity stake. According to management, this MOU should be finalised within 3-6 months and is then likely to proceed to a JV to implement the business in 2022. Second, GULF announced the commencement of the commercial operation date (COD) of its 662.5MW second unit in the Gulf SRC independent power producer (IPP).

A sweet alliance between shareholders of INTUCH and ADVANC

While GULF's entry into the data centre venture is in line with our expectation of it leveraging its partners' strengths to capture the future growth of information technologies, we see two implications from the MOU. First, the MOU between GULF and Singtel rather than with ADVANC signifies that GULF has a good relationship with Temasek and Singtel group, the second largest shareholder of INTUCH and ADVANC after GULF. Second, the alliance between GULF and Singtel should allow ADVANC to continue to run its data centre business independently while allowing the GULF-Singtel JV more flexibility in pursuing business opportunities with ADVANC and other mobile operators.

COD of 662.5MW IPP is on track

Following the COD of its first Gulf SRC IPP unit, GULF commenced the COD of its second unit on 30 September 2021, bringing Gulf SRC's total operating capacity to 1.32GW. In 2022-24, GULF will still have six IPP units with capacities of 662.5MW each to COD, which would turn GULF into Thailand's largest power producer by 2024 with a total capacity of 5.3GW. This should allow GULF to import a sizable amount of LNG for its power plants via its 70%-owned LNG terminal in Maptaphut phase 3.

Top pick in Thai power sector

We maintain BUY and our SoTP TP of THB47. We prefer GULF as our top pick in the Thai utilities sector and believe its net profit growth will hit a record high of over THB3b in 3Q21, driven by a THB1.6b dividend from its 42%-stake in INTUCH and stronger net profits from its new IPPs.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
Gulf Energy Development	GULF TB	THB 41.50	BUY	The downside risks to our SoTP-based TP on GULF include 1) lower-than-expected demand for electricity in Thailand; 2) a lower crude price; and 3) delays in project commercial operation dates.
Intouch Holdings	INTUCH TB	THB 80.50	HOLD	The key downside risks to our NAV-discounted TP are if the sluggish performance from the satellite business continues and if there is a slower-than-expected 5G adoption rate. The key upside risk is if INTUCH synergizes with GULF faster than expected.
Advanced Info Service	ADVANC TB	THB 196.00	BUY	The key downside risks to our DCF-based TP are stronger-than-expected competition in the mobile market and the slower-than-expected adoption of 5G use cases.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 30-Sep-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
