From overhang to over the rainbow

Over the rainbow for coal

We remain positive on BANPU's earnings outlook and project a net profit of THB5b in 3Q21. We expect its core net profit to jump to THB9b in 3Q21 but should be partly offset by large hedging losses for both shale gas and coal. We think 3Q21 will be the first quarter for BANPU to enjoy the coal and gas price upcycle that should continue into 2022. We expect that the substitute impact of the high gas price – due to the tight supply and the stronger-than-expected demand globally for electricity for both cooling in the summer and heating in the upcoming winter – will sustain the coal and gas price spikes into 2022.

Expect a 3Q21 net profit of THB5b

We project a 3Q21 net profit of THB5b and a core net profit of THB9b in 3Q21. We see the key drivers as 1) a higher average selling price (ASP) to USD118/t for the Indonesian coal mines, up from USD81/t in 2Q21; 2) a coal sales volume of 7.9mt, comprising 5.2mt in Indonesia and 2.7mt in Australia; 3) a hedging loss of USD120m, comprising USD65m from a coal hedging volume of 0.5mt at a Newcastle index price of USD80-109.6/t vs USD207/t, and USD55m from a shale gas hedging volume of 9m mmbtu at a price range of USD2.45-3.40/mmbtu vs the Henry Hub gas price of USD5.2/mmbtu at end-Sep-21; and 4) an FX gain of USD50m as a result of the weaker THB/USD currency exchange rate.

Rights offering overhang is now behind

After BANPU's share price declined on 16 Aug-21 from the pre-XR date on 13 Aug-21 at THB13.5/share down to a closing market price of THB10/share post-XR date on 1 Oct-21, BANPU's share price rose by 4.8% on the first day of trading for its 1.692b rights offering (RO) shares. The sharp drop in its share price on 16 Aug-21 should have already fully reflected the dilution impact from the two free warrants, BANPU-W4 and BANPU-W5, and the RO of 1.692b shares.

Time to reload

We maintain BUY and our SoTP-based target price of THB14.6, which already reflects the higher average shares outstanding in 2021-23. We now expect BANPU's share price to rerate, driven by the strong 3Q21E net profit and the likely even stronger q-q and y-y net profits that we expect in 4Q21 into 2022, thanks to the high coal and gas prices that should continue into 2022. We think the stronger demand for coal and gas in the winter season and the tight supplies should sustain the high coal and gas prices over the next nine months.

Investment thesis

We believe BANPU's earnings growth outlook will improve in 2021-22, driven by its coal, gas, and power businesses due to the improving margin outlooks on the stronger demand and tighter supply.

We think that rising Newcastle (NCT) index coal prices in the range of USD68-70/tonne should lead to higher coal earnings in 2021-22. Power earnings should gradually improve with the resumption of full operations at the Hongsa power plant, as well as from its new solar farms in Japan and China and wind farms in Vietnam.

We see three factors that we think will drive up BANPU's earnings in 2021-22. First, BANPU's gas earnings are in an upcycle due to the tighter supply in the US. Second, we expect coal earnings of upward of THB1b-2b, including interest expenses, for 2021-22 on the back of USD75-90/tonne index coal prices. Finally, we see more upsides for its power earnings due to higher projected net profit contributions from Hongsa.

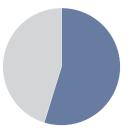

Company profile

BANPU is a leading coal-based energy company in Asia-Pacific with operations in Indonesia and China. It also operates power plants in Thailand and China.

www.banpu.com

Principal activities (revenue, 2020)

■ Coal - 54.8 % ■ Others - 45.2 %

Catalysts

A higher coal price, rising coal production volumes and reserves, and improving net profit growth from its power business would all be key positive catalysts.

Risks to our call

We see downside risks to our SoTP-based TP from lower coal prices, higher diesel costs and any unplanned shutdowns of its power plants.

Event calendar

Date	Event
Nov 2021	3Q21 results announcement

Key assumptions

	2021E	2022E	2023E
Coal sales volume (mtpa)	33.5	34.0	34.0
Newcastle coal price (USD/t)	90.0	75.0	70.0
ASP for coal (USD/t)	73.2	61.0	65.0
Total cost - Indonesia (USD/t)	60.5	57.9	57.5
Total cost - Australia (USD/t)	55.0	55.0	55.0

Earnings sensitivity

- Ceteris paribus, for every 1% rise in average coal price, we project 2021 EPS to rise by 2.6%, and vice versa.
- Ceteris paribus, for every 1% rise in coal sales volume, we estimate 2021 EPS to rise by 1.2%, and vice versa.
- Stability in crude oil price, rising coal prices and high utilisation rates of power plants are key to earnings growth.

From overhang to over the rainbow

We remain positive on BANPU's earnings outlook and project a net profit of THB5b in 3Q21. We expect its core net profit to jump to THB9b in 3Q21 but should be partly offset by large hedging losses for both shale gas and coal.

We think 3Q21 will be the first quarter for BANPU to enjoy the coal and gas price upcycle that should continue into 2022. We expect that the substitute impact of the high gas price – due to the tight supply and the stronger-than-expected demand globally for electricity for both cooling in the summer and heating in the upcoming winter – will sustain the coal and gas price spikes into 2022.

Exhibit 1: Net profit and core profit

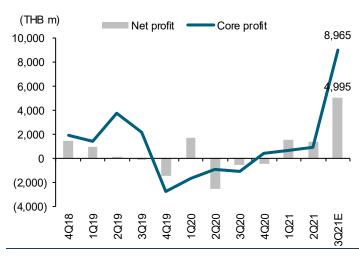

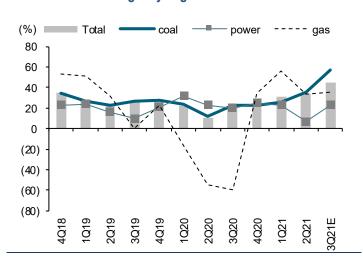

Exhibit 2: Gross margin by segment

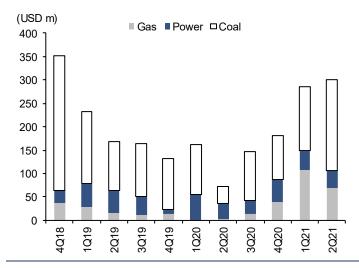

Sources: BANPU; FSSIA estimates

Sources: BANPU; FSSIA estimates

We project its EBITDA to rise from USD0.3b in 2Q21 to over USD0.4b in 3Q21, driven by the sharp rise in EBITDA from the coal mines in Indonesia, China, and Australia, owing to the coal price spike to over USD200/t since the last week of Sep-21.

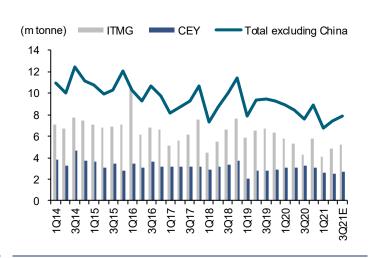

Despite our projections of lower-than-expected coal production volumes in 3Q21 for the Indonesia mines at 5.2mt vs BANPU's guided 5.4mt, for Australia at 2.7mt vs 2.8mt, and China at 1mt vs 1.2mt, we think the higher-than-expected coal prices should more than offset the lower coal production and sales volumes.

Exhibit 3: EBITDA breakdown by segment

Sources: BANPU; FSSIA estimates

Exhibit 4: Coal sales volume projections

Sources: BANPU; FSSIA estimates

Price spike to overshadow cost rise. In 3Q21, the production cost of Indonesian open-pit coal mines rose by over 20% q-q due to the diesel price hike, but the ASP for coal had shot up even faster and higher than the diesel price, leading to our projected gross margin of 63% for BANPU's Indonesia coal business, up from 49% in 2Q21 and 34% in 3Q20.

For the coal mines in Australia, while the coal production cost slightly rose due to the relatively fixed cost portion for underground mines, the ASP increased marginally to USD95/t, as most of the coal sales volume in Australia has already been fixed and sold to power producers in the domestic market. Hence, gross margin for the coal mines in Australia is likely to rise to only 13% in 3Q21, up from 9% in 2Q21, based on our estimate.

Exhibit 5: Coal production cost and average selling price for Indonesian mines

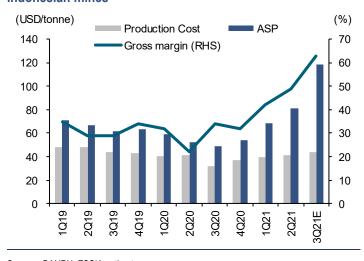

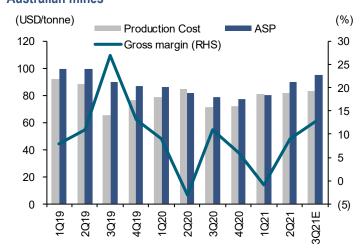

Exhibit 6: Coal production cost and average selling price for Australian mines

Sources: BANPU; FSSIA estimates

Sources: BANPU; FSSIA estimates

Power earnings to decline q-q in 3Q21. We project BANPU's power earnings via its subsidiary, Banpu Power (BPP TB, BUY, TP THB23), to drop from THB1b in 2Q21 to THB0.9b in 3Q21, due to:

- 1) A lower net profit contribution from the Hongsa power plant at THB1b, down 10% q-q due to a lower q-q utilisation rate from 92% in 2Q21 to 83% in 3Q21;
- 2) A lower gross profit from the CHP plants in China from THB12m in 2Q21 to THB4m in 3Q21 due to the higher coal cost;
- 3) A lower net profit from the BLPC power plant to THB60m, down from THB78m in 2Q21 as a result of the lower electricity tarif;
- 4) A net profit contribution of THB50m from the Nakoso power plant in Japan;
- 5) A net loss of THB10m from Banpu NEXT (not listed).

3Q21E results preview

We project BANPU to post a strong net profit of THB5b and a core net profit of THB9b in 3Q21. We see the key drivers as:

- A higher ASP to USD118/t for the Indonesian coal mines, up from USD81/t in 2Q21 and higher than our previous expectation of USD112/t, thanks to the higher Newcastle index coal price (NCT) to over USD200/t at the end of Sep-21;
- A coal sales volume of 7.9mt, comprising 5.2mt in Indonesia and 2.7mt in Australia;
- A hedging loss of USD120m, comprising USD65m from a coal hedging volume of 0.5mt at a price of USD80-109.6/t vs USD207/t NCT, and USD55m from a shale gas hedging volume of 9m mmbtu at a price range of USD2.45-3.40/mmbtu vs the Henry Hub gas price of USD5.2/mmbtu at end-Sep-21;
- An FX gain of USD50m as a result of the weaker THB/USD currency exchange rate.

 $Sources: BANPU; \ FSSIA \ estimates$

Overhang from new shares trading is now likely behind. After BANPU's share price declined on 16 Aug-21 from the pre-XR date on 13 Aug-21 at THB13.5/share down to a closing market price of THB10/share post-XR date on 1 Oct-21, BANPU's share price rose by 4.8% on the first day of trading for its 1.692b RO shares.

The sharp drop in its share price on 16 Aug-21 should have already fully reflected the dilution impact from the two free warrants, BANPU-W4 and BANPU-W5, at a conversion ratio of three existing shares to one new warrant, along with the RO of 1.692b shares at a ratio of three existing shares to one RO share.

We now expect BANPU's share price to rerate, driven by the strong 3Q21E net profit and the likely even stronger q-q and y-y net profits that we expect in 4Q21 into 2022, thanks to the high coal and gas prices that should continue into 2022. We think the stronger demand for coal and gas in the winter season and the tight supplies should sustain the high coal and gas prices over the next nine months.

The most attractive coal play in Thailand

We maintain BUY and our SoTP-based target price of THB14.6, which already reflects the higher average shares outstanding in 2021-23, which we estimate at 8.9b shares, up from 5.5b shares in 2021, and believe the current share price has already priced in the full dilution impact from the RO and warrants.

The disclosure of the survey results of the Thai Institute of Directors Association ('IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the Market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey results may be changed after that date. FSS International Investment Advisory Company Limited does not confirm nor certify the accuracy of such survey results.

* CGR scoring should be considered with news regarding wrong doing of the company or director or executive of the company such unfair practice on securities trading, fraud,

Level

Certified

This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.

Declared This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
Banpu	BANPU TB	THB 13.00	BUY	We see downside risks to our SoTP-based TP from lower coal prices, higher diesel costs and any unplanned shutdowns of its power plants.
Banpu Power	BPP TB	THB 17.70	BUY	Downside risks to our SOTP valuation are the start-up delays of its new projects and government intervention in the electricity tariff.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 01-Oct-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
