Subsidiary is more attractive

Recent developments for ADVANC could benefit INTUCH

We believe the two potential drivers for Advanced Info Service (ADVANC TB, BUY, TP THB220) that INTUCH could directly benefit from are 1) ADVANC's potential to pay a higher dividend; and 2) the potential to utilise its assets in a towerco. However, we think there is a low possibility that a towerco will be established in Thailand, and ADVANC's potentially higher dividend payout may not be significant enough to drive INTUCH's share price further from our TP.

Unclear on THCOM's outlook

We are still unable to see an agreement between Thaicom (THCOM TB, REDUCE, TP THB7.1) and National Telecom (NT) to assist with the management and sales of NT's existing THCOM 4 and 6 satellites after the concession expires in Sep-21. This makes THCOM's earnings outlook starting from 4Q21 unclear. Moreover, THCOM's long-term outlook also remains murky after the Office of The National Broadcasting and Telecommunications Commission decided to postpone the new auction for the right of use for the satellite orbital slots indefinitely, due to there being no other participant except for THCOM.

Minor assumption changes

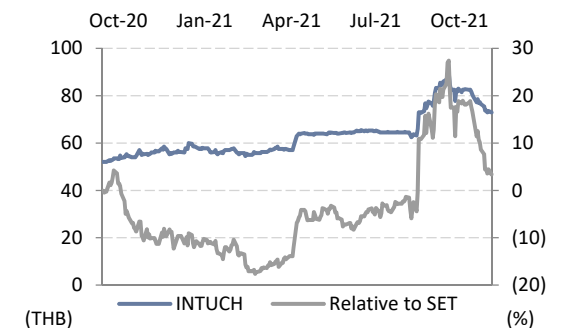

We revise up our earnings assumptions on INTUCH to reflect the latest changes in our earnings forecast for ADVANC. We increase our earnings forecasts on INTUCH for 2021 and 2022 by 2.8% and 3.2%, respectively. Moreover, with the expectation that ADVANC could pay a higher dividend payout ratio from 70% to 75% in 2021, this would enable INTUCH to pay a higher DPS in 2021 as well; we estimate a DPS of THB2.55 per share from our previous expectation of THB2.50.

Maintain HOLD with a revised TP of THB72

We roll over our TP on INTUCH to 2022 after increasing our TP on ADVANC from THB200 to THB220, increasing INTUCH's NAV and resulting in our TP increasing from THB65 to THB72. We maintain HOLD on INTUCH. The company still lacks solid catalysts that would allow it to outperform ADVANC, which still has numerous opportunities awaiting in the future. There has been no significant progress since Gulf Energy Development (GULF TB, BUY, TP THB56) became INTUCH's major shareholder in Sep-21. We recommend a wait-and-see approach for any significant developments between these two companies.

Investment thesis

INTUCH has a strong investment portfolio which includes 1) a 40.44% holding in ADVANC, the largest mobile operator in Thailand with more than 45% of the market share; 2) a 41.13% holding in THCOM, the leading Asian satellite operator and provider of integrated satellite communications; and 3) various venture capital companies.

INTUCH has an impressive dividend payment track record. The company typically pays a high dividend at over a 70% payout ratio, reflecting an attractive dividend yield at above 4% in the past four years.

Company profile

INTOUCH is a holding company with investments in the telecoms, media, and technology sectors, including digital businesses. The principal business units are currently divided into three main areas: wireless telecommunications; satellite and international businesses; and other businesses.

Catalysts

- The upcoming 5G technology should be a key driver for ADVANC, which aims to be the number one 5G operator;
- The new LEO satellite technology could offset the downturn on THCOM's GEO satellite business;
- Consistent earnings which could lead to a consistent dividend yield at around 4.5% p.a.

Risks to our call

The key downside risks to our NAV-discounted TP are if the sluggish performance from the satellite business continues and if there is a slower-than-expected 5G adoption rate. The key upside risk is if INTUCH synergizes with GULF faster than expected.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
Intouch Holdings	INTUCH TB	THB 73.00	HOLD	The key downside risks to our NAV-discounted TP are if the sluggish performance from the satellite business continues and if there is a slower-than-expected 5G adoption rate. The key upside risk is if INTUCH synergizes with GULF faster than expected.
Thaicom	THCOM TB	THB 11.30	REDUCE	The key upside risks to our P/BV-based TP are 1) if the company is able to secure a new right of use concession for the satellite orbital slots and can generate significant revenue from it; 2) if it can form a partnership with NT or LEO satellite operators; and 3) if its operating costs after the expiration of Thaicom 4 and 6 are lower than expected.
Advanced Info Service	ADVANC TB	THB 190.00	BUY	The key downside risks to our DCF-based TP are stronger-than-expected competition in the mobile market and the slower-than-expected adoption of 5G use cases.
Gulf Energy Development	GULF TB	THB 42.75	BUY	The downside risks to our SoTP-based TP on GULF include 1) lower-than-expected demand for electricity in Thailand; 2) a lower crude price; and 3) delays in project commercial operation dates.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
