Covid winner to post-Covid winner

Expect a record high 3Q21 core profit of THB1.2b

We estimate that Covid-related revenue contributions will surge to 65% in 3Q21 from 39% in 2Q21. Covid patients should increase to an average of 5,500 beds/day (5,000 in hospiteles and 500 in hospitals) in 3Q21 from 900 beds/day in 2Q21. Covid screening tests in 3Q21 should be in line with 2Q21 at 900k cases. Thus, we forecast CHG's 3Q21 core profit to hit a record high of THB1.2b (+101% q-q, +311% y-y).

Covid patients moving to a field hospital

CHG is cooperating with WHA Corporation (WHA TB, BUY, TP, THB4.4) and CP Group to construct a 600-bed field hospital at WHA Mega Logistics Center in Samut Prakan to treat Covid patients with yellow to orange-level symptoms. It is expected to be open for one year. CHG spent capex of cTHB100m on medical equipment and plans to move the equipment to new greenfield hospitals (Mae Sot Hospital and Cancer Hospital) after the field hospital closes. CHG has started to shift its Covid patients to the field hospital. This should free up space in hospitals to serve non-Covid patients, which should return in 4Q21 onward.

2022 earnings could surpass the pre-Covid level by 100%

Although the market is concerned that CHG's earnings will peak in 3Q21 and then slow down due to lower Covid patient numbers, we suggest investors look at its post-Covid organic core profit, which we estimate at cTHB1.2b in 2022. Key drivers would be 1) three new managed heart centres at public hospitals; 2) the recovery of non-Covid patients, both Thai and international; and 3) earnings growth for two new hospitals. In addition, we estimate THB0.2b profit from Covid-related services (accounting for c10% of 2021E profit from Covid-related services), which should become recurring profit going forward. Thus, our total 2022E core profit is THB1.4b, exceeding the 2019 level by 100%.

Earnings revised upward; BUY to capture organic growth

We revise up our 2021-22E core profit by 12-40% to reflect the strong 3Q21E results and the better outlook for its organic earnings next year. We maintain our 2023 forecast and our TP of THB4.7/shr. Its share price has fallen from its peak by 13% since July and is trading at an attractive valuation of 30x (vs 5-yr average of 41x). CHG should be one of the few companies that can leverage the pandemic and use it to boost organic earnings going forward.

Investment thesis

CHG opened two new hospitals (RPC and 304 Inter) in 2H18 and they contributed an accumulated loss of THB70m in 2020 (8% of 2020 core profit). Both hospitals have already turned around, and we estimate that this should lead to an EBITDA margin improvement from 24% in 2019 to 29% in 2023.

CHG's revenue contributions from cash patients have gradually increased. This is another key factor to expand its EBITDA margin, in our view, as cash patients have a higher margin than Social Security Office (SSO) patients.

CHG should report strong earnings growth in 2021 led by Covid-related services, including Covid screening tests and Covid patient admissions.

Company profile

CHG operates a healthcare business covering the eastern part of Bangkok and its nearby provinces. The Group owns nine hospitals and four clinics.

Catalysts

Key potential growth drivers include 1) more SSO registered members; 2) rising demand for medical tourists; and 3) an improving EBITDA margin led by new hospitals.

Risks to our call

Downside risks to our DCF-based target price include 1) a slowdown in Thai patient volume due to economic concerns; 2) regulatory risks from drug price and medical bill controls; and 3) SSO provision expenses following limited budgets from the SSO.

Earnings sensitivity

- For every 1% increase in patient volume, we project 2021 earnings to rise by 1%, and vice versa, all else being equal.
- For every 1% increase in EBITDA margin, we project 2021 earnings to rise by 6%, and vice versa, all else being equal.

Exhibit 2: 2022E key earnings growth items

Key growth items	Assumptions
SSO	Expect SSO registered members to increase by 20k-30k
International patients	Expect international patient revenue, which normally contributes around 4-5% of total revenue (cTHB200m), to recover with an NPM of 20-25%
Non-Covid Thai patients	Expect non-Thai patient revenue in 2022E to grow by 10% with NPM of 20%
New hospitals	Expect RPC and CHG304 to contribute a combined profit of THB20m in 2021 and improve to THB50m in 2022
Heart centre management contract	Expect three new managed heart centres to contribute revenue of cTHB400m with an NPM of 15%
Interest savings	Expect CHG to gradually repay its debt thanks to its strong cashflow in 2021, and should reduce interest expenses by 50-60% in 2022
Covid-related services	Expect Covid-related revenue of THB700m-800m in 2022, accounting for 15-20% of Covid-related revenue that we expect in 2021 with an NPM of 20-25%

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 26-Oct-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE**Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
