3Q21 results should hit the bottom

We expect SAT's core net profit in 3Q21 to dip by 13% q-q to THB205m. The company's revenue should be flat at THB2b, despite a 3% q-q decline in Thailand's car production. Kubota tractors still had a strong production volume q-q, which should help SAT's revenue remain flat. However, we expect the company's GPM to drop significantly to 17.6% in 3Q21 vs 19.4% in 2Q21. This is due to the higher steel price which contributes almost 60% of its COGS, which may pressure its GPM.

Thailand's car production is starting to pick up

Although the car production volume in Thailand in 3Q21 dropped by 3% q-q due to the Covid impact, we have seen signs of a solid car production recovery in Sep-21, as the volume has recovered significantly from the bottom in Aug-21 by 35% q-q. Moreover, the company thinks that the car production volume during 4Q21 will have clear signs of a recovery. SAT is still confident that it should reach 1.65m units (+16%) in 2021, while Kubota tractors have the potential to beat its expectation of over 90k units (+20%).

Headwinds are gone

SAT's share price underperformed the market during 3Q21 due to various key downside risks that pressured its outlook. We believe those downside risks are now gone, including 1) the improvement of the flooding situation in Thailand, as the country is now entering the cool season; 2) the steel price is now more stable and most of the higher costs have been passed through to its customers; and 3) car production has already bottomed in Sep-21.

Maintain BUY with TP of THB29

We like SAT considering that 1) its 2021 earnings could hit a new record high; 2) its 2022 outlook remains strong thanks to the expectation of a continuous recovery in the car production level; 3) it has new orders awaiting mass production in 2Q22 at THB200m per year; and 4) it has an attractive dividend yield at above 7% p.a. We believe this is a great time to reinvest in SAT, after its share price declined by 20% from early Aug-21. We maintain BUY on SAT with our TP of THB29, pegged to 11x P/E (+1.7SD of its mean P/E). The company also has a healthy amount of cash on hand of over THB2.6b waiting for future investments.

Investment thesis

SAT is the largest producer of axle shafts (76% market share), which are used in the manufacturing of one-tonne pickup trucks and large commercial cars.

SAT is the safest company in the automotive sector, in our view, as it has no debt and holds more than THB2.5b in cash, equal to THB6 per share. The company has a solid earnings outlook, as Thailand's automobile manufacturing industry is one of the largest drivers of the country's economy. The demand for new cars in Thailand has consistently remained at 0.8m-1m units per year, according to historical data. Therefore, when the economy returns to normal, we expect Thailand's automobile production volume to also return to its normal level in 2022, which would directly benefit SAT.

Company profile

SAT manufactures parts for the motor vehicle industry. These parts are for: passenger cars, pickup trucks, and the agricultural industry. Its major customers are original equipment manufacturers (OEMs) on long-term purchase contracts, as well as the replacement equipment manufacturer (REM) segment.

Catalysts

- The strong recovery of Thailand's car manufacturing industry in 2021;
- Cost reduction program;
- Solid dividend yield track record at 5-7% p.a.

Risks to our call

The key downside risks to our P/E-based TP are the domestic car manufacturing industry recovering more slowly than expected, a slower-than-expected adoption rate for electric vehicles in Thailand, and worse global demand for pickup trucks.

Event calendar

Date	Event
Nov 2021	3Q21 results announcement

Key assumptions

	2021E (%)	2022E (%)	2023E (%)
Car production growth	29	9	7
Kubota tractor growth	20	4	7

Earnings sensitivity

- For every 1% increase in auto-part revenue, we project 2021 earnings to rise by 0.5%, and vice versa, all else being equal.
- For every 1 bp increase in gross profit margin, we project 2021 earnings to rise by 1.1%, and vice versa, all else being equal.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

History of change in investment rating and/or target price

Somboon Advance Technology (SAT TB)

Date	Rating	Target price	Date	Rating	Target price	Date	Rating	Target price
01-Oct-2020	HOLD	12.50	21-Jan-2021	BUY	18.50	29-Apr-2021	BUY	25.50
21-Oct-2020	BUY	15.40	19-Feb-2021	BUY	20.00	23-Jul-2021	BUY	29.00

Naruedom Mujjalinkool started covering this stock from 01-Oct-2020

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Somboon Advance Technology	SAT TB	THB 21.10	BUY	The key downside risks to our P/E-based TP are the domestic car manufacturing industry recovering more slowly than expected, a slower-than-expected adoption rate for electric vehicles in Thailand, and worse global demand for pickup trucks.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 26-Oct-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
