Catching up with the GRM uptrend

A bumpy 3Q21 ahead of a jumping 4Q21 net profit

While we expect BCP's 3Q21 net profit to weaken q-q, its 4Q21 net profit should significantly improve q-q and y-y, driven by the market GRM jumping by 1-2x q-q, based on BGG's market GRM for TOP as a proxy. We project BCP to post a strong 3Q21 net profit of THB2.3b, up 29% q-q and from a net loss of THB647m in 3Q20. However, we expect its core net profit to weaken q-q to THB531m, down 16.5% q-q but up 161% y-y.

Unconverted oil remains BCP's unique strength

The 3Q21E net profit of THB2.3b should be driven by 1) a higher refinery utilisation rate to 91% or 110kbpd, up from 89% or 107kbpd in 2Q21, due to the shorter planned shutdown; 2) a lower market GRM to USD3.0/bbl, down from USD4.2/bbl in 2Q21, due to the q-q higher crude premium of over USD1/bbl that was partly offset by the q-q higher product margins; 3) a higher production yield for unconverted oil (UCO), whose price is linked to the diesel price plus a USD2-3/bbl premium, from 6% in 2Q21 to 11% in 3Q21, thanks to its value as a feedstock for the production of lube groups II and III; 4) an inventory gain of THB1.3b in 3Q21; 5) a THB0.6b gain from the divestment of its stake in the recently listed Ubon Ethanol (UBE TB, NR); 6) a hedging loss of USD1/bbl or THB0.3b, up from THB0.2b in 2Q21; and 7) BCP produced only 4% jet vs 53% diesel and 20% gasoline, as the jet-crude margin remained weak in 3Q21.

Net profit: weak downstream marketing vs strong upstream E&P

Its marketing oil stations had a lower sales volume by 10% q-q to 920m litres in 3Q21 due to the lockdown, despite the 8 new oil station additions, while the industrial segment plunged 16% q-q on the lockdown. Its marketing margin declined to THB0.75/litre in 3Q21 from 0.88/litre in 2Q21. We project its power earnings to rise q-q to THB0.7b in 3Q21, driven mainly by a sharp rise in the profits from the two hydropower plants Nam San 3A&B due to the high water level to offset the q-q weaker earnings from its geothermal plants and wind farms due to shutdowns and lower wind speeds. A rising sales volume to 16.98kbpd and the higher prices of oil and gas (+2x q-q) drove the net profit contribution from OKEA (46% owned by BCP) to THB0.5b in 3Q21.

GRM rise is a key driver

We maintain BUY and our SoTP target price of THB38. We think BCP, as a refiner with over two-thirds of its earnings from the refinery business, should see a marked rise in its market GRM in 4Q21 as a result of the higher demand and lower crude premium cost.

Investment thesis

BCP's earnings sustainability has continued to improve thanks to its well-diversified earnings portfolio, with 50-60% of its EBITDA coming from less cyclical non-refinery businesses, including oil stations (20%), power (25%), bio-based products (10%), and exploration & production (E&P) (1%) as of 2019.

We believe BCP's growth strategy to increase the number of its oil stations by 330 stations (+30% from 1,080 stations in 2017) from 2017 to 2023 will allow the company to not only improve its overall profitability but also position it as the second largest oil station operator in Thailand. This growth strategy would allow BCP to become a self-sufficient refiner with 100% captive demand for refined oil products from its downstream oil stations by 2023.

Company profile

BCP is Thailand's sixth largest refiner and second largest gas station operator. The company's Suboar refinery has a nameplate capacity of 120kbpd. It also runs 1,140 oil stations (as at end-2Q18) and biodiesel plants.

Catalysts

A stronger-than-expected recovery in market GRM on wider-than-expected diesel cracks and lower-than-expected crude premiums is a key potential catalyst.

Risks to our call

The downside risks to our SoTP-based TP include: 1) lower-than-expected demand for petroleum products; 2) higher crude premiums; and 3) unplanned shutdowns of the company's refinery plants.

Earnings sensitivity

- For every 1% increase in average Dubai oil price, we project 2021 earnings will rise by 1.2%, and vice versa.
- For every 1% increase in market GRM, we estimate 2021 earnings will rise by 1.4%, and vice versa.
- Stability in crude oil price, rising diesel cracks, and low crude premiums are key for earnings growth.

Source: FSSIA estimates

A weak 3Q21 should be followed by a strong 4Q21 net profit

While we expect BCP's 3Q21 net profit to weaken q-q, its 4Q21 net profit should significantly improve q-q and y-y, driven by the market GRM jumping by 1-2x q-q, based on BBG's market GRM for Thai Oil (TOP TB, BUY, TP THB67) as a proxy.

We project BCP to post a strong 3Q21 net profit of THB2.3b, up 29% q-q and from a net loss of THB647m in 3Q20. However, we expect its core net profit to weaken q-q to THB531m, down 16.5% q-q but up 161% y-y. Key points are:

Exhibit 1: TOP, SPRC, BCP – market GRM

Source: Company data

Exhibit 2: TOP, SPRC, ESSO, BCP – gross refining margin

Source: Company data

Refinery remained weak due to higher crude premiums

- A higher refinery utilisation rate to 91% or 110kbpd in 3Q21, up from 89% or 107kbpd in 2Q21, due to the shorter planned shutdown;
- A lower market GRM to USD3.0/bbl in 3Q21, down from USD4.2/bbl in 2Q21, due to the q-q higher crude premium of over USD1/bbl that was partly offset by the q-q higher product margins of gasoline, diesel, and jet fuel;
- A higher production yield of UCO, whose price is linked to the diesel price plus a USD2-3/bbl premium, from 6% in 2Q21 to 11% in 3Q21, thanks to its value as a feedstock for the production of lube groups II and III. BCP plans to increase the UCO yield to 16% by 2022 at the expense of lower production yields of high sulphur fuel oil and diesel;
- An inventory gain of THB1.3b in 3Q21, flat q-q, despite the higher q-q crude oil price, as BCP has a higher-than-normal crude inventory carried forward from 2Q21;
- A THB0.6b gain from the divestment of its stake in the recently listed Ubon Ethanol;
- A hedging loss of USD1/bbl or THB0.3b, up from THB0.2b in 2Q21;
- BCP produced only 4% jet vs 53% diesel and 20% gasoline, as the jet-crude margin remained weak in 3Q21.

Marketing oil stations were impacted by the lockdown

- The sales volume for its oil stations dropped 10% q-q to 920m litres in 3Q21, while the industrial segment plunged 16% q-q due to the lockdown impact;
- The marketing margin declined to THB0.75/litre in 3Q21, down from 0.88/litre in 2Q21;
- 8 new oil stations were added in 3Q21, similar to the additions in 2Q21.

Power strengthened on strong earnings from hydropower plants

- We project its power earnings to rise q-q to THB0.7b in 3Q21, driven mainly by a sharp rise in the profits from the two hydropower plants Nam San 3A&B due to the high water level to offset the q-q weaker earnings from its geothermal plants and wind farms due to shutdowns and lower wind speeds.

E&P profit jumped on higher prices of oil and gas

- A rising sales volume to 16.98kbpd and the higher prices of oil and gas (+2x q-q) drove the net profit contribution from OKEA (46% owned by BCP) to THB0.5b in 3Q21, despite the planned shutdown of one gas field.

Exhibit 3: TOP's GRM vs Singapore GRM (daily)

Source: Bloomberg

Exhibit 4: TOP's GRM vs Singapore GRM (weekly)

Source: Bloomberg

Biofuel sales volume plunged

- We expect its biodiesel sales volume, with a capacity of 1mlpd, to drop 10% q-q in 3Q21 due to the lockdown impact, while its gross profit should rise q-q, driven by the q-q higher margin;
- The ethanol sales volume dropped q-q in 3Q21 due to the weak demand, while the feedstock cost rose, pressuring the gross margin.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Bangchak Corp	BCP TB	THB 28.00	BUY	The downside risks to our SoTP-based TP include: 1) lower-than-expected demand for petroleum products; 2) higher crude premiums; and 3) unplanned shutdowns of the company's refinery plants.
Thai Oil	TOP TB	THB 56.25	BUY	Downside risks to our EV/EBITDA-based TP are a sharp rise in oil price and weak demand for refined oil products.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 27-Oct-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE**Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
