TP vs CONSENSUS	+3.4%

## Impairment loss & lockdowns hurt 3Q

### Weaker q-q for all units on the lockdown and new supplies

SCC's 3Q21 net profit (NP) of THB6.8b (-60% q-q, -30% y-y) missed our estimate by 33% and BBG's consensus estimate by 30% due to the weak chemical and packaging NPs and non-recurring items of THB2,065m from the impairment of its cement plant in Myanmar and a gain on a fair value adjustment. The chemical unit's NP dropped to THB5.2b, down 50% q-q and 5% y-y, due to the weak product margins on the new capacity in China. Its cement & building material (CBM) unit saw a net loss of THB2.4b in 3Q21 due to a lower ceramics sales volume (-7% y-y) and weak cement demand in Thailand (-12% y-y). 3Q21 packaging NP declined q-q to THB1.8b (-21% q-q, +33% y-y) due to a weaker sales volume and margins that were partly offset by rising NPs from M&A.

### Weak margins but strong sales volume for chemical unit

The chemical unit's 3Q21 NP dropped by 5% y-y due to the lower product margins. Sales volumes (PE and PP) rose to 505kt, up 26% q-q, driven by the sales volumes in new markets. The overall chemical EBITDA margin plunged to 10%, dragged down by HDPE-naphtha (-21% q-q), PP-naphtha (-21% q-q), and PVC-ethylene dichloride (-32% q-q), but was partly offset by the strong butadiene-naphtha margin at USD687/t (+52% q-q) on the tight supply and strong demand.

### Rising coal cost and weak demand hurt CBM earnings in 3Q21

The cement unit posted a net loss of THB2.4b, down from an NP of THB2.5b in 2Q21, due to the lockdown, heavy rainfall, rising costs, and an impairment loss of THB3.6b for the cement plant in Myanmar. In 3Q21, domestic cement demand dipped 12% y-y, with a -9% y-y demand dip from the government sector (40% of total demand) and -15% y-y lower demand from the non-government sector (60%). Domestic cement prices were flat q-q at THB1,700-1,750/t. The ceramics sales volume was 35m sqm in 3Q21, down 15% y-y due to the lockdowns in ASEAN markets, while ceramics prices rose 10% y-y on a better product mix.

### Time to invest ahead of visibly strong earnings recovery

Maintain BUY and our SOTP TP of THB520. We think SCC's 3Q21 earnings have hit the bottom. Quarterly NPs should rebound markedly starting in 4Q21, driven by 1) the absence of an impairment loss; 2) higher chemical margins due to China's lower exports; and 3) improving NPs from the packaging and CBM units on the economic reopenings.

## KEY STOCK DATA

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Suwat Sinsadok started covering this stock from 14-Oct-2020

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Siam Cement	SCC TB	THB 397.00	BUY	Downside risks to our SOTP based TP include 1) a lower-than-expected demand for chemicals, CBM, and packaging; 2) rising coal costs for its cement and packaging units; and 3) weaker demand from the automobile industry that could erode the demand for SCC's chemical unit and its dividend contributions.

Source: FSSIA estimates

#### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 27-Oct-2021 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
