## Waiting for signs of a recovery

### Expect softer 3Q21 results

Given the 9% q-q and 7% y-y decline in TV advertising expenditure (adex) during 3Q21 due to the Covid impact, we expect BEC's TV revenue to drop by 11% q-q to THB1.1b. Its 3Q21 utilisation rate should drop from 70% in 2Q21 to 60%. Global content licensing (GCL) and digital revenue should also slightly decrease from the previous quarter as there was less content to be sold in 3Q21 due to the Covid impact. We anticipate that BEC's 3Q21 GPM should remain at 30%, while SG&A to sales should slightly decline to its normal level. As a result, we expect BEC's core net profit in 3Q21 to be at THB147m (-21% q-q).

### Signs of a recovery have not manifested yet

Despite the reopening of economic activities since Sep-21, adex in Sep continued to slow down from the previous month. We believe this was due to the number of Covid cases in Sep-21 remaining high. However, we believe that adex in Sep-21 should mark the bottom, with a recovery starting in the following month. This is a slight delay from other indicators like domestic car sales and the Consumer Confidence Index which already posted strong recoveries in Sep-21. We are waiting to see how adex recovers in 4Q21, which should be a high season.

### Guidance revision on GCL

BEC has revised its GCL target revenue from THB400m to THB300m in 4Q21, while maintaining its digital revenue target at THB600m. The company continued to broadcast its drama re-runs in late 3Q21 and 4Q21 and held back its fresh programs, waiting for the adex recovery in order to maximise its revenue potential. Nevertheless, we believe that 4Q21 will continue to be the high season for GCL and digital revenue.

### Maintain BUY with TP of THB15

Although BEC's outlook may seem unattractive, lacking short-term positive catalysts, we believe that it has the potential to realise high-margin revenue on the GCL business, assuming that the Covid situation improves continuously next year. Coupled with a solid adex recovery and the resumption of its event business, we expect BEC to post solid earnings growth next year by 34% y-y to THB859m. We maintain our net profit forecast at THB641m for this year. Its long-term outlook remains strong, in our view. Maintain BUY on BEC with our 2022 TP of THB15 pegged to 35x P/E (+1SD of its mean P/E).

### Investment thesis

BEC used to be the second biggest TV operator in Thailand, and regularly enjoyed profits of more than THB4b per year. However, changes in consumer behaviour, more competitors, and a continuous decline in advertising expenditure (adex) have hurt BEC, which has booked a loss for three consecutive years.

However, we believe that 2021 will be the first profitable year for the company, given its recent adex recovery and efficient cost cutting, and believe its financial performance could improve significantly next year.

### Company profile

BEC’s principal business operations are its 1) content business – TV, online, global content licensing, program sourcing, production distribution; and 2) supporting businesses – the production of variety shows and content and promotional campaign activities.

### Catalysts

- A strong recovery in 2022 should boost the company’s revenue;
- A huge cost reduction;
- If it can expand its market share via global content licensing.

### Risks to our call

The key downside risks to our P/E-based TP are a lower-than-expected adex recovery and the company’s worse-than-expected cost reduction.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
