## Opportune entry point

### Underestimating earnings growth potential in 2021-23

We believe the market underestimates IVL's net profit growth potential in 2021-23, reflected in our EPS forecasts being 18-66% higher than Bloomberg's consensus estimates. The key variances are from 1) the integrated PET and PTA (IPP) margin in Asia, Europe, and North America (West), as a result of the sustained freight cost hike due to the pandemic and the production cuts in China from the electricity crunch; 2) the higher-than-expected margins of IVL's downstream products in the integrated oxide and derivatives (IOD) group, which include surfactants, ethanolamine, propylene oxide (PO), and monoethylene glycol (MEG); and 3) the expected strong demand for polyester and PET globally in 4Q21 following the gradual global reopening.

### IOD to boost 3Q21 core/net profits to THB5.2b and THB7.4b

We project a 3Q21 net profit of THB7.4b, down 12% q-q but up 18x y-y, and a core net profit of THB5.2b, down 21% q-q but up 5.5x y-y. Key expectations are: 1) a 10% q-q higher sales volume due to the strong demand for PET and polyester to offset the weak demand for automotive fibres due to the chip shortage; 2) a solid IPP margin in Western markets, which has remained above USD600/t since Aug-21, supported by the freight cost hike; 3) rising margins of IOD downstream products; 4) a q-q weaker IPP margin in Asia due to the new supply from China, though the impact has reversed in Oct-21 due to China's power shortage; 5) a q-q weaker MTBE margin despite the higher gasoline price and demand due to the sharp rise in butane and methanol costs as a result of the spike in the gas price in the US; and 6) an inventory gain of USD40m.

### Upside from ethane cracker start-up in Oct-21

We expect the EBITDA generated from the IOD group to be USD42m in 3Q21 and USD40m-50m in 4Q21, based on IVL's 4.1mt capacity and the strong margins of downstream IOD products, despite the continued weak MTBE margin. An EBITDA upside of up to USD30m in 4Q21 could come from the start-up of IVL's 0.44mt ethane cracker on 1 Oct-21 after a long delay since Jul-21 and a lightning strike in 2020.

### Time to Buy ahead of above-consensus 3Q21E results

Maintain BUY and our target price of THB62, based on 7.4x 2022E EV/EBITDA. We believe IVL is highly attractive for its strong net profit growth outlook that we think should beat Bloomberg's consensus estimates for 2021-23 by significant margins.

## KEY STOCK DATA

## Investment thesis

We believe IVL is now at an inflection point for its third growth phase, transforming from a high value-added (HVA)-driven, polyethylene terephthalate (PET)/purified terephthalic acid (PTA)-focused product company into a packaging, olefin-integrated company in 2019-23.

Unlike its last two growth cycles when IVL funded its capacity growth through debt and capital increases using warrants (IVL-W1 and IVL-W2), key growth strategies in IVL's third growth cycle could be driven by 1) M&A in the global packaging business, non-PET packaging in frontier markets and specialty chemicals for polyester chain products; and 2) backward integration into the olefins business, including an ethane cracker, propylene production, and downstream polyethylene (PE) and polypropylene (PP), as these are key feedstock materials for IVL's growing packaging segment. The integration focus should only be on self-sufficient, non-merchant applications.

## Company profile

Indorama Ventures (IVL) was incorporated in 2003 to start up a petrochemical business in Thailand. Initially focusing on wool fibre, the company expanded into the polyester chain, including polyester fibre, PET, and PTA.

## Principal activities (revenue, 2020)

Source: Indorama Ventures

## Major shareholders

Source: Indorama Ventures

## Catalysts

Potential catalysts for IVL include 1) higher PET and PTA margins; 2) a 10% y-y rising sales volume due to multiple acquired assets in 2018; and 3) an EBITDA margin recovery for HVA products, given the re-pricing of HVA products to reflect higher feedstock costs.

## Risks to our call

The key downside risks to our EV/EBITDA-based TP are weaker-than-expected margins for PX-PTA and PET-PTA, lower demand for polyester, and delays in IVL's projects.

## Event calendar

Date	Event
Nov 2021	3Q21 results announcement

## Key assumptions

	2021E (USD/tonne)	2022E (USD/tonne)	2023E (USD/tonne)
Utilisation rate (%)	87	88	89
PET margin	249	261	357
PTA-PX margin	142	147	122
MEG-(0.58) ethylene margin	250	230	230
IOD EBITDA	340	360	440

Source: FSSIA estimates

## Earnings sensitivity

- For every 1% change in the THB/USD exchange rate, we estimate a 1.4% change in 2021 EPS, all else being equal.
- For every 1% increase in latex price, we estimate 2021 EPS would fall 0.7%, and vice versa, all else being equal.
- For every 1% increase in utilisation rate, we estimate 2021 EPS would rise 1.5%, and vice versa, all else being equal.
- For every 1% increase in ASP, we estimate 2021 EPS would rise by 0.8%, and vice versa, all else being equal.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Suwat Sinsadok started covering this stock from 09-Oct-2018

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Indorama Ventures	IVL TB	THB 42.00	BUY	The key downside risks to our EV/EBITDA-based TP are weaker-than-expected margins for PX-PTA and PET-PTA, lower demand for polyester, and delays in IVL's projects.

Source: FSSIA estimates

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 02-Nov-2021 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
