IOD is now a true hero

IOD led the charge in 3Q21

IVL's 3Q21 net profit (NP) was THB6.5b, down 22% q-q but up 16x y-y, beating BBG's consensus estimate by 18% but missing ours by 12%, due to an after-tax inventory gain of THB1.8b. 3Q21 core NP was THB5.9b (-11% q-q, +368% y-y). The key factors were: 1) a strong 3Q21 core EBITDA of USD437m (-8% q-q, +74% y-y) from the improving margins of the integrated oxide and derivatives (IOD) group that offset the weaker margins of integrated PET-PTA, polyester, MTBE and MEG; 2) a higher sales volume to 3.73mtpa in 3Q21 (+3% q-q, +1% y-y) due to the higher utilisation rates of the IOD group (95%) that offset the lower utilisation rates of PET (85%) and fibres (74%); and 3) the overall utilisation rate rose q-q to 85% in 3Q21, up from 84% in 2Q21. Non-recurring items included 1) a THB1.8b after-tax inventory gain; 2) income of THB56m from the acquisition of an asset in Brazil; 3) a THB15m insurance claim; 4) a THB172m acquisition expense; 5) a THB10m impairment loss from PPE; and 6) expenses of THB399m related to the shutdown of its ethane cracker and the polar vortex.

Strong IOD performance supported 3Q21 EBITDA margin

The core EBITDA margin dipped to 11% in 3Q21, down from 13% in 2Q21, driven by 1) a low EBITDA margin for integrated PET-PTA at 11%, down from 14% in 2Q21; 2) a higher IOD EBITDA margin at 17%, flat q-q due to improving surfactants and ethanalamine margins and utilisation rates; and 3) the fibre margin at 5%, down from 8% in 2Q21.

Expect a strong 4Q21 net profit

We expect IVL's NP to rise in 4Q21-2022 on stronger product margins and higher utilisation rates for the IOD, PET-PTA, and fibre groups, with q-q improving MTBE and MEG margins. Key potential drivers are: 1) a stronger PET-PTA margin due to China's lower export volumes and solid demand; 2) a polyester fibre margin recovery for the automotive and lifestyle segments; and 3) the start-up of its ethane cracker in Nov-21 after the lightning strike in 2H20.

Top pick in Thai petrochemical sector

We maintain BUY and our TP of THB62, based on 8.2x 2021E EV/EBITDA. IVL remains our top pick in the Thai petrochemical sector given its highly visible and strong net profit growth outlook from both organic growth (rising volumes and margins) and M&A.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Indorama Ventures	IVL TB	THB 42.50	BUY	The key downside risks to our EV/EBITDA-based TP are weaker-than-expected margins for PX-PTA and PET-PTA, lower demand for polyester, and delays in IVL's projects.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 04-Nov-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
