UNCHANGED

TARGET PRICE	THB13.50
CLOSE	THB12.10
UP/DOWNSIDE	+11.6%
TP vs CONSENSUS	+11.7%

## Higher margins offset lower sales

### Higher CPO price drove 3Q21 net profit

GGC's 3Q21 core net profit (NP) was THB112m, up 7.5% q-q but down 33% y-y. Including a pre-tax THB132m inventory gain, GGC posted a 3Q21 NP of THB244m, beating our forecast by 10% and BBG consensus by 14%. Its EBITDA margin rose to 9.2% in 3Q21, up from 4.6% in 2Q21, due to a higher methyl ester (ME) margin. Its 3Q21 EBITDA of THB459m came from 1) THB167m EBITDA from ME, up from THB42m in 2Q21, including a THB49m inventory gain; and 2) fatty alcohol (FA) EBITDA of THB292m, up 65% q-q, including a THB83m inventory gain.

### Weak ME demand offset by higher FA margin

The 3Q21 sales volume for ME dipped to 75.2kt, or 87m litres, down 1% q-q and 29% y-y, due to the weak demand from the Covid impact and continued high competition. The 3Q21 sales volume for FA rose 1% q-q to 25.6kt, due to the higher demand for detergents and no planned shutdowns. The crude palm oil (CPO) price jumped 7% q-q to THB36/kg in 3Q21, while the benchmark ME price rose 5% q-q to THB45/kg, or THB39/litre, due to the lower CPO inventory. The ME-CPO margin remained stable q-q at THB3.1/kg. The FA market price-to-feedstock (P2F) increased to USD315/t, up 15% q-q but down 16% y-y due to the high feedstock cost of crude palm kernel oil (CPKO) at USD1,204/t (-9% q-q, +68% y-y) vs the average FA price of USD1,784/t (-6% q-q, +44% y-y), mainly due to the weak price of mid-cut FA.

### Weak 4Q21 outlook ahead of a stronger projected 2022

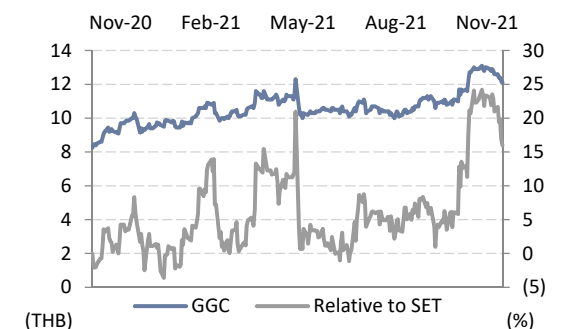

We think GGC's net profit outlook in 4Q21 remains weak due to the high feedstock costs and intense competition. However, it should recover in 2022, driven by the improving demand for ME in Thailand and FA in Asia after the economic reopening in Nov-21. GGC expects to start up its 0.6m litre per day ethanol plant via a 50-50% JV with Kaset Thai International Sugar Corporation (KTIS TB, not rated) in 1Q22. But we expect GGC to realise quarterly net losses in 1H22 before reaching profitability in 2H22 when sugarcane feedstock production should rise on seasonality.

### Demand recovery on reopening

Maintain BUY and our TP of THB13.5, based on 13.4x 2022E EV/EBITDA. We think GGC should see improving margins for both ME and FA in 2022, driven by lower feedstock costs and higher demand for FA exports and domestic ME.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Global Green Chemicals	GGC TB	THB 12.10	BUY	Downside risks to our EV/EBITDA-based target price include: 1) a sharp decline in crude palm oil price; 2) a change in government policy for biodiesel from the current B7; and 3) a narrower fatty alcohol margin due to the new supply in the US.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 05-Nov-2021 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
