## Tripping over four new plants

### Weak 3Q21 net profit due to losses from new power plants

TPCH's 3Q21 net profit (NP) was THB51.8m, down 15% y-y but up 7% q-q. The key culprit was the lower-than-expected profit contributed due to the planned shutdowns of the 8MW Maewong Energy (MWE) plant and Pattani Green Power (PTG) and the expiration of the Chang Rak (CRB) plant's THB0.3/kWh feed-in-tariff (FIT) premium in Mar-21. This was offset by a higher production level from Pattalung Green Power (PGP) and Satun Green Power (SGP). TPCH incurred net losses from TPCH1, TPCH2, and TPCH5 – all being ramped up after their start-ups in Jan-21, though they have faced malfunctioning machine shutdowns.

### Higher revenue and EBITDA from new power plants

3Q21 revenue was strong at THB660.5m (+40% y-y, +3% q-q) on the start-ups of four power plants (PTG, TPCH1, TPCH2, TPCH5), but was offset by higher costs from the shutdown-related expenses for MWE and PTG and higher fuel costs and net losses from the four new plants. The EBITDA margin rose to 35.1% in 3Q21 from 32.3% in 2Q21 and 40.1% in 3Q20. 3Q21 EBITDA rose to THB231.9m (+22% y-y, +12% q-q), driven by the revenue from its new power plants. 3Q21 interest expenses rose to THB37.7m (+48 y-y, +1.5% q-q) due to the higher debt to fund TPCH1, TPCH2, and TPCH5.

### Improvement is on the horizon

We expect TPCH to have stronger earnings in 4Q21-2022, backed by higher utilisation rates for its four new biomass power plant projects – TPCH1, TPCH2, TPCH5, and PTG – which should gradually ramp up after a period of operational fine-tuning. In addition, we project stronger earnings momentum from its waste-to-energy plant, SP1, in Nonthaburi (50% of 10MW).

### Still a good renewable play in Thailand

We believe TPCH remains one of Thailand's attractive plays in biomass power plants, with the expected improvement of its four new power plants as a key earnings growth driver in 4Q21 into 2022. TPCH has already pursued a strategy to reduce its biomass feedstock costs and is improving the operational efficiency of the four power plants currently running at subpar utilisation rates. In addition, TPCH, via a partnership with Siam Power (not listed), is now developing four new WTE projects (SP2-5).

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
