## Gas cost hike should be short-lived

### Higher gas cost eroded 3Q21 results

BGRIM's 3Q21 net profit (NP) was THB447m, down 11% y-y and 56% q-q. 3Q21 core NP was THB571m (-23% y-y, -44% q-q), 5% below our estimate and 15% below BBG consensus. The main culprits were the higher gas cost, which was partly offset by the demand recovery for industrial users (IU). The 3Q21 EBITDA margin was at 26.3%, down from 30.7% in 2Q21, driven by the higher gas cost at THB268/mmbtu (+14% y-y, +12% q-q), offset by the higher selling price for electricity to IUs at THB3.27/kWh (-0.3% y-y, +1.2% q-q) and to the Electricity Generating Authority of Thailand (EGAT) at THB3.07/kWh (+9% y-y, +8% q-q).

### Margin declined while sales volume improved in 3Q21

3Q21 revenue rose to THB11.7b (+5% y-y, +2% q-q), boosted by higher revenue from EGAT and higher electricity revenues from IUs in Thailand to offset the weaker revenue in Vietnam. The electricity volume sold to EGAT dipped to 2,445GWh (-2.5% y-y, -2.8% q-q) due to shutdowns. Steam revenue decreased 6.3% y-y due to a 21.5% y-y drop in the steam selling price despite a higher y-y sales volume. 3Q21 financing costs jumped to THB1.2b (+25% y-y, +30% q-q) due to a higher interest expense to fund new projects and M&A and an unrealised FX loss of THB372m, offset by a realised FX gain of THB69m in 3Q21.

### Up to THB0.2b net profit downside on the higher gas cost in 4Q21

During its 3Q21 analyst conference call, management indicated that BGRIM plans to alleviate the impact of the mismatch between its selling price and gas cost increase q-q by THB62/mmbtu to THB320/mmbtu in 4Q21 by 1) adding new IU demand; and 2) completing two more M&A. Based on our calculation, since every THB1/mmbtu rise in gas cost would reduce its NP by THB15m annually, we estimate that the rise in gas cost by THB32/mmbtu would reduce its 4Q21 NP by THB232m, representing c1/3 of BGRIM's normalised quarterly net profit. In 2022 onward, BGRIM will 1) import 0.65mtpa (100mmscfd) of LNG to be used for its five SPPs with SPP replacement PPAs; and 2) adjust the electricity selling price to be linked to the gas cost, rather than the nation's wholesale price only.

### NP growth to resume in 2022 onward

We maintain BUY and our SoTP-based TP of THB58. We believe BGRIM's NP growth will return in 2022 onward after a weak 4Q21E NP caused by the higher gas cost. A key catalyst is its five new SPPs.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 11-Nov-2021 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
