TP vs CONSENSUS	+14.1%

Bright outlook lies ahead

Record high 3Q21 net profit as expected

CHAYO posted a record high 3Q21 net profit of THB71m (+121% y-y, +102% q-q), in-line with our estimate and BBG's consensus forecast. Its 9M21 net profit accounts for 68% of our 2022 forecast. We see limited downside risks and are convinced that CHAYO will deliver impressive performance in 4Q21.

Strong cash collection in 3Q21

CHAYO had solid total cash collection (CC) of THB187m in 3Q21, driven mainly by the NPA business. It was also able to sell a big-value NPA. Its pre-tax profit from the NPA side was THB55m. The solid NPA business outweighed the softening NPL business, especially unsecured NPLs. The CC from unsecured NPLs was lower q-q due to the weaker repayment ability of clients affected by Covid-19. Regarding other businesses (c6% of total revenue), there was a gradual improvement in 3Q21 revenue due mainly to its lending business. CHAYO's loan portfolio was outstanding at THB123m in 3Q21 vs THB64m in 2Q21. It aggressively lent to the small SME segment in 3Q21 and intends to lend secured loans to that segment with a 15% interest rate charge and less than 50% loan-to-value. The average ticket size would be cTHB20m. Moreover, the company is likely to launch new lending products in nano-finance and consumer product lending. CHAYO is targeting a portfolio value of THB500m in 2021. In the longer run, the company aims to have an IPO for this business.

Solid performance set to continue in 4Q21

We expect CHAYO to deliver another strong net profit in 4Q21. Its cash collection from the NPL business should improve q-q following the economic reopening and the re-opening of the Legal Execution Department. We expect that CHAYO will be able to complete a mid-size NPA sale in 4Q21. On top of that, we think its loan portfolio should increase thanks to its aggressive business expansion.

Maintain BUY with 2022 GGM-based TP of THB18.8

We maintain our BUY call. We think its valuation looks interesting, trading at 0.8x 2022E PEG. We also believe CHAYO has distinct advantages over its competitors. These include 1) a hybrid portfolio of unsecured and secured distressed assets – a well-balanced portfolio that should provide sustainable growth in the long term; and 2) a smaller asset size than its peers, giving it greater operational flexibility.

Record high 3Q21 net profit as expected

CHAYO posted a record high 3Q21 net profit of THB71m (+121% y-y, +102% q-q), in-line with our estimate and BBG's consensus forecast. The company had solid total CC of THB187m in 3Q21, driven mainly by the non-performing asset (NPA) business, while it was also able to sell a big-value NPA. Its pre-tax profit from the NPA side was THB55m. The solid NPA business outweighed the softening non-performing loan (NPL) business, especially unsecured NPLs. The CC from unsecured NPLs was lower q-q due to the weaker repayment ability of clients affected by Covid-19. Regarding other businesses (c6% of total revenue), there was a gradual improvement in 3Q21 revenue due mainly to its lending business. CHAYO's loan portfolio was outstanding at THB123m in 3Q21 vs THB64m in 2Q21. It aggressively lent to the small SME segment in 3Q21.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 11-Nov-2021 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
