## Beneficiary of global tourism recovery

### KEY STOCK DATA

#### Promising outlook led by Maldives and UK in 4Q21

At SHR's analyst meeting on 19 Nov, management indicated its positive outlook in 4Q21. SHR expects the 4Q21 OCC rate to stay above 70%. The OCC rate in Oct was at 56%, dipping from 57% in 3Q21, as SHR has changed its strategy to increase ADR instead, expecting it to rise to USD400 in 4Q21 – the same level as 4Q19 but higher than USD300 in 3Q21. UK hotels, which have already turned profitable since Aug, should maintain their performance in 4Q21. UK hotels' OCC rate remained high at 64% in Oct, sliding from 68% in 3Q21 due to school openings. However, it should increase again in the festive season in Dec. ADR remained strong at c16%, exceeding the pre-Covid level QTD in 4Q21.

#### Mauritius, Fiji and Thailand are in a recovery mode

SHR expects a V-shaped recovery for its Outrigger portfolio. A hotel in Mauritius reached an OCC rate of 40% in Oct after the country reopened its borders that month. SHR expects it to improve to 60% in Dec. Meanwhile, Fiji will open its borders in Dec, and the pent-up demand of tourists from Australia and New Zealand should drive the OCC rate to 30-40% in Dec, possibly improving to 60% in 1Q22. Thailand would be the most challenging portfolio. However, SHR still expects an OCC rate of 45-60% in Dec from 17% in Oct.

#### Turnaround likely in 2022, with an upside from ADR

Overall, we estimate a smaller 4Q21 core loss of THB100m-150m. We believe 1Q22 would be too early for a turnaround as UK hotels would enter the lowest tourism season. Therefore, we think SHR could turn around in 2Q22 at the earliest. Thus, we estimate a core profit of THB99m in 2022 with the scope of an upside from ADR, as we see signs that pent-up demand could push the ADR to surpass the pre-Covid level in UK hotels, and it would apply to other countries as well.

#### Turnaround would push share price to above book value

SHR is trading at an attractive valuation of 0.8x 2022E P/BV, lower than its peers' average of 2.1x. SHR has booked a core loss since its IPO in Nov 2019 due to losses from its Maldives operations and the impact from the Covid pandemic. Thus, if SHR starts to book a profit, it would support market confidence for the company's long-term outlook and potentially allow its share price to convert to its IPO price at THB5.2/shr.

## Investment thesis

SHR raised THB7.5b at THB5.20/shr during its IPO in Nov-19. Its share price has fallen since then, mainly due to operating losses from the two hotels under the Crossroads Maldives project and the impact from the Covid-19 pandemic.

Maldives has reopened its borders to international tourists since 15 Jul-20. SHR's two hotels in Maldives (40% of total revenue as of 2020) should capture the strong tourism recovery. Its UK portfolio has also recovered after travel restrictions were eased.

SHR's share price is attractive as it has been trading at a deep discount to its THB4.5/shr book value as of 3Q21 and has a potential upside from M&A deals, considering that it has a strong balance sheet with only 0.9x IBD/E as of 3Q21.

## Company profile

SHR is the holding company of all of the resorts and hotels under the Singha Estate (S TB, not rated) group.

## Catalysts

Key potential growth drivers include 1) a faster OCC ramp-up rate following a global tourism recovery; 2) the rollout of Covid-19 vaccines; and 3) M&A deals.

## Risks to our call

Downside risks to our DCF-based target price include 1) extraordinary events such as political turmoil and natural disasters; 2) a higher hotel room supply, which may result in price competition; and 3) the slower-than-expected recovery of international tourist numbers.

## Earnings sensitivity

- For every 5% increase in OCC rate, we project a 2021 loss reduction of 20%, and vice versa, all else being equal.
- For every 1% increase in EBITDA margin, we project a 2021 loss reduction of 3%, and vice versa, all else being equal.

## Recap: 3Q21 results review

SHR reported a 3Q21 core loss of THB291m, in line with our estimate. Including a THB9m unrealised FX gain, its 3Q21 net loss was THB282m. This is a smaller loss compared to the THB549m core loss in 2Q21, due to the improving performance of Maldives and UK hotels.

3Q21 revenue grew by 77% q-q due to a 39% q-q increase in Maldives hotels and a 111% q-q increase in UK hotels' revenue. The OCC rate of Maldives hotels improved to 57% in 3Q21 from 44% in 2Q21 due to lifting of the suspension of Indian tourists. The OCC rate of UK hotels jumped to 68% in 3Q21 from 34% in 2Q21 thanks to the easing of lockdown restrictions. The ADR of UK hotels also improved to THB3,664, exceeding the pre-Covid level by 10%. EBITDA turned positive at THB253m in 3Q21, with an EBITDA margin of 18%.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
