Moving into LNG-to-power IPP

First LNG-to-power project is finally announced

According to Bloomberg, BGRIM plans to invest USD200m in the Houston-based Energy Capital Vietnam (ECV) to develop a USD1.75b LNG-to-power power plant project in Southern Vietnam. BGRIM, ECV, and Siemens Energy will be the three shareholders of the 3.6GW LNG-to-power project, which is pending the announcement of Vietnam's new Power Development Plan 8. This project requires 3mtpa of imported LNG and is scheduled to commence operations in 2025.

Five new growth projects within three months

In 2021, BGRIM has already announced five new growth projects, including 1) Dec-21: a 3.6GW LNG-to-power plant in Vietnam (USD200m); 2) Dec-21: 95.78MW solar and wind farms via a 49.9% stake in KOPOS, a South Korea-based renewable company (USD3.5m); 3) Nov-21: a 45% stake in reNIKOLA group, which owns Pimpinan Ehsan Berhad, a listed company on the stock exchange of Malaysia (THB3.2b investment cost); 4) Nov-21: a 48MW wind farm project via an 80% stake in Huang Hoa Holding (THB0.2b); and 5) Oct-21: 75-100% stakes in three small power producers (SPPs) from Eastern Power Group (EP TB, NR) via a 45%-owned JV with Univentures BGP (THB12.4b).

Growth to start in 2Q22 onward

Looking beyond the weak 4Q21E and 1Q22E net profits due to the gas price hike, we project BGRIM's net profit growth to accelerate in 2022-23, driven by 1) new industrial user demand of 30MW in 4Q21; 2) three new M&A that should start to contribute profits to BGRIM in 2022; 3) structurally lower gas costs from 0.65mt (100mmscf) of imported LNG; 4) a margin expansion from the five new SPPs under SPP replacement power purchase agreements with staggered commercial operation dates in Jul-Dec 2022; and 5) the expected upward adjustment of the electricity selling price by 1Q22 to link with the higher costs of gas, oil, and coal since mid-2021.

Good entry point ahead of strong 2022E net profit

We maintain BUY and our SoTP-based target price of THB58. We think that its share price overhang should end by 1Q22 and likely outperform by 2Q22, backed by multiple new growth projects from both organic (5 SPPs) and inorganic growth.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
