EQUITY RESEARCH - COMPANY REPORT

KRUNG THAI BANK

KTB TB

THAILAND / BANKS

Hidden gem is ready to shine

- In-line 4Q21 net profit of THB5b, driven by loan growth.
- Stronger NII and utilising big data to generate higher fee income should lead to a 9% rise in 2022 net profit.
- Maintain BUY with 2022 GGM-based TP of THB15.5.

Decent 4Q21 results on strong loan growth

KTB reported a 4Q21 net profit of THB4,944m (+43% y-y, -2% q-q), which was in-line with our expectation. KTB posted very strong loan growth of 2.7% g-g and 12.6% y-y, driven mainly by the government and corporate segments. Its non-recurring Non-NII jumped in 4Q21 due to a mark-to-market gain on financial assets and bad debt recovery. Its provisions also fell y-y as KTB had proactively set aside provisions in 2020. As a result, its net profit increased substantially y-y in 4Q21. However, thanks to the seasonal increase in its OPEX and a rise in losses from the sale of foreclosed assets, its net profit slightly went down q-q. Regarding asset quality, its NPLs were relatively stable q-q, with an improvement in its NPL formation rate (based on our calculation).

The return of NII in 2022, plus...

We believe KTB's NII will turn to increase 6% y-y supported by a continued rise in its loan volume. We expect that the government segment should increase continuously. Moreover, KTB might be more comfortable to lend to the retail segment more aggressively following an economic recovery, resulting in a higher NIM in 2022, in our view.

... Big data trove should improve KTB's net profit in 2022

We think KTB's big data trove and its move into digital could help its 2022 fee income jump by 8% y-y, after dropping for four consecutive years from 2018-21. Although we think KTB may accelerate its IT investment, this should not hurt its OPEX as: 1) the bank has been able to control other costs effectively; and 2) some IT investment spending can be realised as CAPEX. Thus, we believe its OPEX will increase by 3% in 2022, implying a cost-to-income ratio of 44.3%. All in all, we forecast KTB's 2022 net profit to increase moderately by 9% y-y.

Maintain BUY with 2022 GGM-based TP of THB15.5

We reiterate our BUY call as we believe KTB will utilise its digital users' big data to generate top-line growth. Thus, we expect its net profit could increase by 12% CAGR in 2022-24. We also think KTB's share price will garner the most positive sentiment from a globally rising interest rate environment. KTB's valuation is undemanding at 0.5x 2022E P/BV.

Investment thesis

We reiterate our BUY call as we believe KTB will utilise its digital users' big data to generate top-line growth. Thus, we expect its net profit could increase by 12% CAGR in 2022-24. We also think KTB's share price will garner the most positive sentiment from a globally rising interest rate environment. KTB's valuation is undemanding at 0.5x 2022E P/BV.

Company profile

Krung Thai Bank began operations in 1966 and in 1989 was the first privatised state enterprise to be listed on the SET. At end-2019, KTB was the second largest Thai bank in terms of lending, and ranked fourth by total assets.

Catalysts

Potential share price catalysts for KTB include:

- Faster utilisation of big data to capture digital trends;
- Lower credit cost from a better-than-expected new NPL rate;
- Better operating cost control.

Risks to our call

Downside risks to our GGM-based TP are 1) prolonged economic sluggishness and further waves of the Covid-19 pandemic affecting loan growth and asset quality; 2) the impact of further interest rate cuts on NIM and potential new regulations from the Bank of Thailand on debt-servicing programs; and 3) an increase in OPEX due to aggressive digital investment.

Decent 4Q21 results on strong loan growth

KTB reported a 4Q21 net profit of THB4,944m (+43% y-y, -2% q-q), which was in-line with our expectation. KTB posted very strong loan growth of 2.7% q-q and 12.6% y-y, driven mainly by the government and corporate segments. Its non-recurring Non-NII jumped in 4Q21 due to a mark-to-market gain on financial assets and bad debt recovery. Its provisions also fell y-y as KTB had proactively set aside provisions in 2020. As a result, its net profit increased substantially y-y in 4Q21. However, thanks to the seasonal increase in its OPEX and a rise in losses from the sale of foreclosed assets, its net profit slightly went down q-q. Regarding asset quality, its NPLs were relatively stable q-q, with an improvement in its NPL formation rate (based on our calculation).

2021 net profit came in at THB21,588m, increasing 29% y-y, due largely to a reduction in its provisions as the bank had provided special provisions in 2020 alongside efficient operating cost control. These were able to offset a softening in its NII thanks to a drop in its NIM, as most of its loan growth came from low-yield segments.

Big data trove should improve KTB's net profit in 2022

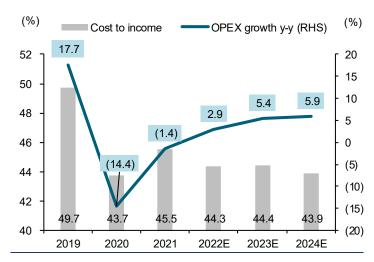

We believe KTB's NII will turn to increase 6% y-y, supported by its loan volume which should continue to rise. We expect that the government segment should increase continuously. Moreover, KTB might be more comfortable to lend to the retail segment more aggressively following an economic recovery. This would result in a higher NIM in 2022, in our view. On top of that, we think KTB's big data trove and its move into digital could help its 2022 fee income jump by 8% y-y, after dropping for four consecutive years from 2018-21. Although we think KTB may accelerate its IT investment, this should not hurt its OPEX as: 1) the bank has been able to control other costs effectively; and 2) some IT investment spending can be realised as CAPEX. Thus, we believe its OPEX will increase by 3% in 2022, implying a cost-to-income ratio of 44.3%. All in all, we forecast KTB's 2022 net profit to increase moderately by 9% y-y.

The disclosure of the survey results of the Thai Institute of Directors Association ('IOD") regarding corporate governance is made pursuant to the policy of the Office of the Securities and Exchange Commission. The survey of the IOD is based on the information of a company listed on the Stock Exchange of Thailand and the Market for Alternative Investment disclosed to the public and able to be accessed by a general public investor. The result, therefore, is from the perspective of a third party. It is not an evaluation of operation and is not based on inside information.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey results may be changed after that date. FSS International Investment Advisory Company Limited does not confirm nor certify the accuracy of such survey results.

* CGR scoring should be considered with news regarding wrong doing of the company or director or executive of the company such unfair practice on securities trading, fraud,

Level

Certified

This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.

Declared This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Krung Thai Bank	КТВ ТВ	THB 13.70	BUY	Downside risks to our GGM-based TP are 1) prolonged economic sluggishness and further waves of the Covid-19 pandemic affecting loan growth and asset quality; 2) the impact of further interest rate cuts on NIM and potential new regulations from the Bank of Thailand on debt-servicing programs; and 3) an increase in OPEX due to aggressive digital investment.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 21-Jan-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
