UNCHANGED

## Entry into a WTE growth roadmap

- GULF's entry into a WTE power plant is in line with our expectations that it may add more WTE capacity in 2022-23.
- The move into the WTE power segment further strengthens GULF's utility portfolio and improves earnings diversification.
- Maintain BUY and SoTP-based target price of THB56.

TARGET PRICE	THB56.00

## Entry into WTE power plant

On 24 Jan-22, GULF announced the acquisition of a 99.99% stake in the All Waste To Energy Co, which owns a 99.99% stake in Chiangmai Waste To Energy (CM WTE) – the rights holder for managing the waste disposal system of the Chiang Mai Provincial Administrative Organization. CM WTE's power plant is a very small power producer with a capacity of no more than 10MW. GULF aims to develop the project on a scale of no less than 9.5MW; possibly up to 9.9MW, in our estimation.

## Growth from WTE power is just starting

We are positive on this move, given: 1) the EIRR of over 12-15%, based on the tipping fee (collection fee) of THB500/t, which is equivalent to a THB1.2/kWh tariff, and the THB3.5-4.0/kWh feed-in-tariff for the 9.5-9.9MW WTE power plant, based on our estimate; and 2) the projected THB50m-100m net profit addition to GULF by 2025. We believe GULF will seek more growth opportunities in Thailand's WTE industry, given the government's plan for 400MW of new WTE capacity. We expect GULF to add up to 100-200MW WTE capacity in 2022-23 under the upcoming Power Development Plan 2022 that aims to increase renewable energy sources to 50% of total capacity by 2040.

## Strategic growth roadmap for growth and diversification

The direction of GULF's recent strategic moves to grow its asset portfolio has become more apparent since its initial public offering on Dec-17. In the past four years, GULF has focused on expanding its asset portfolio horizontally by growing its utilities and adding infrastructure projects, including a port (Laemchabang phase 3), an LNG terminal (Maptaphut phase 3), and motorways. Since 2020, GULF has begun to grow more vertically, diversifying into LNG imports and telecommunications infrastructure via its 42% stake acquisition in INTUCH, which effectively allows GULF to take advantage of ADVANC's information technology.

## GULF is 'growth' in Thailand's utility industry

We maintain BUY and our SoTP-based TP of THB56. We think GULF's earnings growth will accelerate in 4Q21-2023 on new growth projects. We think GULF's visibly strong net profit growth in 2022 will be a key catalyst that is likely to limit its share price downside.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Gulf Energy Development	GULF TB	THB 50.25	BUY	The downside risks to our SoTP-based TP on GULF include 1) lower-than-expected demand for electricity in Thailand; 2) a lower crude price; and 3) delays in project commercial operation dates.
Intouch Holdings	INTUCH TB	THB 77.00	HOLD	The key downside risks to our NAV-discounted TP are if the sluggish performance from the satellite business continues and if there is a slower-than-expected 5G adoption rate. The key upside risk is if INTUCH synergizes with GULF faster than expected.
Advanced Info Service	ADVANC TB	THB 223.00	BUY	The key downside risks to our DCF-based TP are stronger-than-expected competition in the mobile market and the slower-than-expected adoption of 5G use cases.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 24-Jan-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

## Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

## Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
