Oil spill downside risk

- SPRC announced an oil leak from its undersea oil pipeline at its single point mooring facility, which is currently under control.
- We believe the oil leak could pose a financial downside risk but should have no impact on its refinery's operation.
- Maintain BUY and TP of THB13.5.

Oil leak incident poses a downside risk

Last night on 25 Jan-22, SPRC announced that there was an oil leak from its undersea oil pipeline at its single point mooring (SPM) facility, potentially releasing up to 0.4m bbls of crude oil into the ocean, according to Bangkokbiznews. SPRC has successfully controlled the oil spill and has informed the related parties, including the surrounding communities and regulators, regarding the incident.

A downside risk from third-party liability

We believe the oil leak could pose a financial downside risk to SPRC in the form of third-party liability, given the potential impact of the oil spill on the nearby communities. However, on the business side, SPRC said there should be no impact on its refinery's operation as it has stored 4-5m bbls of crude oil in the tanks, sufficient to run its refinery for one month at an 80-85% utilisation rate. If the SPM issue requires longer than one month to fix, SPRC said it will import crude oil via smaller ships, which may incur additional freight expenses.

Will SPRC's insurance sufficiently cover the liability?

While the oil spill amount remains unknown, we think the downside risk is limited. First, SPRC has three insurance policies: 1) third-party liability insurance (likely applies to this case) of up to USD1b with a USD1m deductible amount; 2) business interruption insurance (unlikely); and 3) property damage coverage of USD50m-100m (unlikely). Second, unlike PTTGC's oil spill of 50k litres in Jul-13, which damaged the beaches and nearby environment, SPRC's plant location is farther from Koh Samed, a major tourist island, and is therefore less likely to cause damage to the beach, in our view. On 26 Aug-16, the Civil Court ordered PTTGC to pay compensation of THB30k-50k each to the 203 people affected, mainly Koh Samed seaside business operators and fishermen, resulting in total compensation of THB15m.

Strong net profit outlook to offset short-term overhang

Maintain BUY and TP of THB13.5. We expect SPRC to post a strong net profit in 4Q21 and 1Q22, driven by a higher market GRM of USD5-6/bbl, up 2x q-q, due to improving product margins and lower crude premiums. This should overcome the risk from the oil leak, in our view.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
Star Petroleum Refining	SPRC TB	THB 10.50	BUY	TP is based on EV/EBITDA. Downside risks are a sharp rise in oil price and weak demand for refined oil products.
PTT Global Chemical	PTTGC TB	THB 56.75	BUY	The key downside risks to our EV/EBITDA-based TP are the weaker-than-expected HDPE price and HDPE-naphtha margin.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 25-Jan-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE**Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
