At the base of a U-shaped recovery

- Expect a soft 4Q21 NP of THB1.2m (-12% y-y, +1% q-q).
- U-shaped recovery maintained; NP recovery potentially from 2Q22.
- Muted short-term catalysts, not our most preferred.

Expect another soft net profit in 4Q21

We expect MTC to report a weak 4Q21 net profit of THB1,211m (-12% y-y, +1% q-q). The only strong point we see is its remarkable 4Q21E loan growth over its peers at 8% q-q and 29% y-y. However, we expect another four items to be in soft territory. First, we think its fee income will plummet 30% y-y and 23% q-q due to the impact from the new debt collection fee measures. Second, its OPEX should increase moderately from the debt collection incentive paid to its staff. Third, its NPLs might increase moderately by 13% q-q due to the end of debt forbearance program and strong loan growth in the past quarters. Thus, its 4Q21 credit cost should surge to 110 bps vs 93 bps in 3Q21, in our view. Lastly, we expect a drop in its loan yield to 18.5% vs 18.7% in 3Q21.

Slow recovery

We think MTC's recovery could be U-shaped. We expect it to post only a minimal increase q-q in its 1Q22 net profit (slightly decreasing y-y). Although its loan volume could continue to grow strongly, its performance will likely be dragged down by 1) a stable but low loan yield; 2) lower fee income from the impact of the new debt collection restrictions; and 3) an increase in provisions following a moderate rise in its NPLs after the debt forbearance ends. A strong earnings recovery should start from 2Q22.

Expanding to new business, but contribution still small

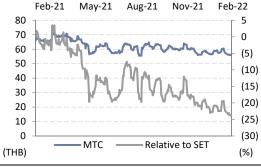

In Oct-21, MTC set up a new subsidiary, Muangthai Pay Later, though has provided very little information about it. To control asset quality, MTC will target its existing clients first, according to management. We believe this new business won't generate any significant profits for MTC in the first six months of operation. It could have the same business concept as Srisawad Corp (SAWAD TB, BUY, TP THB80)'s home appliance hire purchase business. We think MTC might start this business in 1Q22. We expect MTC to provide more details at its analyst meeting on 15 Feb-22.

Negatives priced-in, but muted short-term catalysts

We fine-tune our 2021 net profit forecast to reflect the potentially lower earnings than we had previously forecast in 4Q21. We maintain BUY and our TP of THB69 as we think the slow recovery is priced in. However, we see muted short-term catalysts for its share price to rerate. Thus, MTC is not our top pick. It might be back on our radar once it starts to raise its interest rate charges and provides a clearer business plan.

Investment thesis

MTC is the largest listed non-bank personal and auto title loan service provider in Thailand. We believe that the business prospects for secured consumer loans remain solid. The demand for fast cash is less volatile in varying economic conditions, though spending purposes may differ. Operationally, MTC has long experience and strong management expertise, reflecting its ability to drive growth and contain asset quality.

We maintain BUY and our TP of THB69 as we think the slow recovery is priced in. However, we see muted short-term catalysts for its share price to rerate. Thus, MTC is not our top pick. It might be back on our radar once it starts to raise its interest rate charges and provides a clearer business plan.

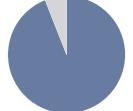

Company profile

MTC has provided lending services since 1992, focusing on motorcycle title loans, and commands the highest market share in Thailand. The company has also expanded its business to personal and other title loans such as car, agricultural and land title loans.

Catalysts

Potential share price catalysts for MTC include:

- 1. Strong growth in its new business, hire purchase loans for motorcycles;
- 2. The end of low-rate charges for motorbike title loans;
- 3. Better cost control.

Risks to our call

Downside risks to our GGM-based TP include 1) a further weakening of asset quality that could potentially hit both loan yield and credit cost; and 2) changes in financial regulations by the Bank of Thailand and the Office of Consumer Protection Board.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
