BUY
 UNCHANGED

Second oil leak is under control

- SPRC announced that an estimated 5,000 litres of oil had leaked during the investigation to find the root cause of the oil leak.
- Likely limited impact on SPRC, with a potential earnings upside from the rising market GRM to over USD5/bbl in 4Q21 into 1H22.
- Maintain BUY and our target price of THB13.5.

A second oil leak of 5,000 litres during the investigation process

On 10 February 2022, SPRC announced that an estimated 5,000 litres of oil had leaked during the investigation to find the root cause of the oil spill. The leak occurred about 20 km away from the shore and nine navy ships were dispatched to contain the oil slick, according to the Bangkok Post. The 5,000 litres of oil leaked is a part of the total oil spill of 47,000 litres that SPRC had announced on 25 January 2022. The recent oil leak is classified as "Tier 1" by SPRC, meaning that the leak contains no more than 20 tonnes of oil.

Speeding up clean-up process and compensation procedure

SPRC's CEO, Mr. Robert Dobrik, has firmly promised to speed up the clean-up process and accelerate the compensation procedure to all affected groups, as well as hasten the rehabilitation of the environment. During 30 January to 9 February 2022, there were 6,268 complaints filed at a special complaints centre, set up after the oil leak incident. According to Rayong governor, Mr. Charnna Lamsaeng, the compensation rate will be based on a Rayong Civil Court ruling in PTTGCs oil leak case in 2013, which ordered PTTGC to pay financial compensation to 203 people affected by the 27 July 2013 oil spill of between THB30,000 to THB50,000 per plaintiff, depending on the extent of the damage.

GRM upside over oil spill downside

Looking beyond the oil spill downside, which we think will have a limited impact on SPRC, we see a potential earnings upside from SPRC's rising market gross refining margin (GRM) to over USD5/bbl in 4Q21 into 1H22, driven by much higher margins for gasoline, diesel, and particularly jet fuel, based on the Dubai crude oil price, despite the sharp rise in global crude prices. We believe the current uptrend in product margins over the Dubai price should continue into at least mid-2022, based on the stronger demand outlook and the resumption of intercontinental tourism.

Oil spill hiccup provides a buying opportunity

We maintain BUY and our target price of THB13.5. SPRC is now back as our top pick in the Thai refinery sector given the company's successful and effective crisis management of the oil spill which limited the financial and corporate governance damages, allowing its share price to rerate.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 10-Feb-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
