ASP plunged faster than expected

- 4Q21 NP was THB1.8b (-59% q-q, -78% y-y), dragged down by a sharp drop in ASP due to the higher supply.
- We project that STGT's NP will continue to decline in 2022-23, dragged down by lower ASPs toward USD29.90ptp in 2023.
- Maintain REDUCE and our target price of THB26

ASP crash flattens 4Q21 net profit

STGT's 4Q21 net profit (NP) was THB1.8b (-59% q-q, -78% y-y), missing the BBG consensus estimate by 34% and our forecast by 23%, dragged down by a sharp drop in average selling price (ASP) to USD22.92 per 1,000 pieces (ptp) (-51% q-q), due to the higher supply. This was partly offset by the higher sales volume at 7.8b (+10% q-q) as production rose at all plants after the end of shutdowns due to Covid-19. The ASP plunges were across all three product types, with natural rubber (NR) powdered gloves plunging by 37% q-q, NR powder-free gloves by 0.1% q-q, and nitrile gloves by 26% q-q. The utilisation rate rose to 93% in 4Q21, up from 90% in 3Q21, despite the container shortage.

Margin severely squeezed in 4Q21

4Q21 revenue dipped 24% q-q and EBITDA dropped 58% q-q, with the EBITDA margin plunging to 27%, down from 49% in 3Q21 and 70% in 4Q20. The gross margin weakened to 31% in 4Q21, down from 52% in 3Q21 and 72% in 4Q20, driven by the lower ASP to USD22.92ptp (-64% y-y). The net margin decreased to 22% in 4Q21, down from 42% in 3Q21, despite the 71% q-q lower tax expense due to the lower ASP.

ASP decline could continue in 2022

We project that STGT's NP will continue to decline in 2022-23, dragged down by lower ASPs toward USD29.92ptp in 2023, despite our projected y-y lower nitrile and NR costs and rising capacity in 2022-23. While we think the strong backlog for NR and NBR gloves will remain into 2022-23, we think the projected sharp drop in ASPs will continue in 2022-23. STGT remains committed to its capacity expansion, planning to reach 48.1b pieces in 2022, 67.2b pieces in 2023, and 81.9b pieces in 2024, up from 40.3b pieces in 2021, with a target to achieve a proportion of 50% for NBR gloves in 2024, up from 41.6% for NBR gloves in 2021.

Downside remains

We maintain REDUCE and our target price of THB26. We think STGT's net profit growth momentum will drop in 2022-23, given the weaker net profit outlook for the industry based on our projection of weaker ASPs. We believe the downside for STGT's shares would come mainly from the valuation derating on the back of the sharp drop in the ASP trend.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
