BUY
UNCHANGED

New plant delays undermined 4Q21

- 4Q21 net loss was THB12.2m due to the 92-day unplanned shutdown of its 8MW MWE plant.
- For the short term in 1Q22, we expect TPCH to have weak earnings due to the rising fuel cost.
- Maintain BUY and SoTP-based TP of THB14.

Disappointing 4Q21 results on higher fuel costs

TPCH's 4Q21 net loss was THB12.2m. The key culprit was a lower-than-expected profit contribution due to the 92-day unplanned shutdown of the 8MW Maewong Energy (MWE) plant from 18 Sep to 18 Dec-21, a higher expense for the Toongsung Green (TSG) plant due to a wood chopper machine adjustment, and the sharp rise in fuel costs for three new biomass power plants – Pattanee Green (PTG), TPCH2, and TPCH5. This was offset by a higher production level from PTG. TPCH incurred net losses from TPCH1, TPCH2, and TPCH5 – all of which were being ramped up after their start-ups in Jan-21, but with low utilisation rates of 50% (TPCH1), 79% (TPCH2), and 88% (TPCH5), respectively, due to machine malfunctions. There was also a THB13m loss from its waste-to-energy power plant due to the higher fuel cost.

Four new plants remain key drags

4Q21 revenue was weak at THB600.9m (+27% y-y, -9% q-q) on the poorer operations of four new power plants (PTG, TPCH1, TPCH2, TPCH5), but was offset by higher costs from the shutdown-related expenses for MWE and PTG, and higher fuel costs and net losses from the four new plants. The EBITDA margin dipped to 27.9% in 4Q21 from 35.1% in 3Q21 and 29.9% in 4Q20. 4Q21 EBITDA dropped to THB168m (+19% y-y, -28% q-q), driven by the y-y higher revenue from its new power plants but poorer operating rates. Interest expenses rose to THB54m (+99% y-y, +44% q-q) due to the higher debt to fund TPCH1, TPCH2, and TPCH5.

2Q22 should see an earnings recovery

In the short term in 1Q22, we expect TPCH to have weak earnings due to the rising fuel cost, but by 2Q22 we think its earnings should rebound, backed by higher utilisation rates for its four new biomass power plant projects – TPCH1, TPCH2, TPCH5, and PTG – which should gradually ramp up after a period of operational fine-tuning.

Fuel cost hiccup should evaporate by 2Q22

We maintain BUY and our TP of THB14. We believe TPCH is an attractive play in biomass power plants, with the expected improvement of its four new power plants as a key earnings growth driver in 2Q22.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

History of change in investment rating and/or target price

TPC Power Holding (TPCH TB)

Date	Rating	Target price	Date	Rating	Target price	Date	Rating	Target price
20-Feb-2020	BUY	15.00	05-May-2021	BUY	18.00	31-Aug-2021	BUY	14.00

Suwat Sinsadok, CFA, FRM, ERP started covering this stock from 08-May-2020

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
TPC Power Holding	TPCH TB	THB 11.20	BUY	The downside risks to our SoTP-based TP include 1) lower-than-expected demand for electricity in Thailand, 2) a lower crude price, and 3) higher costs of biomass feedstock.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 18-Feb-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
