## Getting a foothold in Thai tourism

- Booked a smaller core loss q-q and y-y of THB0.3b in 4Q21, in line with our estimate.
- Expect a turnaround in 2022; earnings should accelerate, led by improving margins and strong projects in the pipeline.
- Maintain BUY with higher DCF-based TP of THB6.

### Operations recovered in 4Q21

AWC reported an improving core loss of THB0.3b in 4Q21, vs the core loss of THB0.7b in 3Q21, thanks to the easing of lockdown restrictions. The OCC rate of the hotel business improved from 14% in 3Q21 to 29% and RevPAR hit the highest level since Covid began, accounting for c30% of the pre-Covid level. Meanwhile, the retail and office building business' OCC rate was flat q-q at 65%, with an improving rental rate by 22% q-q. Including a THB1.6b gain on changes in the fair value of investment properties, AWC booked a net profit of THB967m in 4Q21.

### Set to turn profitable in 2022 with a strong flow-through ratio

We expect the recovery momentum to continue in 2022. The hotel OCC rate should jump from 20% in 2021 to 40-50%, led by strong domestic demand and the recovery of international tourists. Note that revenue from Thai guests jumped from 7% in 2019 to 59% of total hotel revenue in 2021, with room nights sold increasing by 119% to 193k in 2021. In addition, AWC reduced its fixed costs by 35% from 2019 to 2021. When revenue recovers, we expect the EBITDA margin to jump from 1% in 2021 to 33% in 2022 premised on the strong flow-through ratio of 60% for the hotel business and 80-90% for the retail and office building business. Overall, we expect AWC to turn profitable in 2022.

### In an expansion mode with an improving EBITDA margin

AWC is entering into a growth period, driven by both inorganic and organic growth. It plans to open up to 31 hotels with almost 10,000 guest rooms by 2027, from 17 hotels with about 5,200 rooms currently. We also expect the hotel EBITDA margin to accelerate from 1% in 2021 to 40% in 2025, given that more than 70% of its assets are in the ramping up, re-positioning and development phases. This should lead to strong core profit growth of 29% CAGR over 2019-25.

### Revising up TP after incorporating three new hotel projects

We revise up our 2022 DCF-based TP to THB6 from THB5.6 after factoring in the three new hotel projects (one in Chiang Rai and two in Bangkok) that were recently announced. AWC's share price has the potential to convert back to its IPO price of THB6.0/shr, driven by the recovery of its operations, in our view.

## Investment thesis

AWC plans to aggressively expand its hotel portfolio from 17 hotels to 31 hotels by 2027 and expand its commercial property assets with a net leasable area (NLA) of 427k sqm to 560k sqm by 2027.

AWC has a strong balance sheet with an IBD/E of only 0.6x as of 4Q21, with ample room for M&A deals. AWC also has a competitive advantage, as it has a grant of rights (GOR) agreement with its major shareholder, Thai Charoen Corporation Group (TCC, not listed). Under the GOR, AWC has the right of first offer on assets that TCC plans to sell, and the right of first refusal on assets when any third party makes an offer.

Most of AWC's assets are classified as freehold, with about half of its asset value in land located in prime areas across Thailand. We believe those assets will likely appreciate in the future, which should support its balance sheet's gearing ratio for expansion projects.

## Company profile

AWC is the pure-play leader in the Thai hospitality and commercial property business.

## Catalysts

Downside risks to our DCF-based target price include 1) extraordinary events such as political turmoil and natural disasters; 2) a higher hotel room supply, which may result in price competition; and 3) the slower-than-expected recovery of international tourist numbers.

## Strong projects in the pipeline to support growth

### Announced three new hotel projects

AWC announced that it is exercising its right to acquire three assets under ROFO/ROFR agreement from related parties (TCC Group and Mr. Charoen and Khunying Wanna Sirivadhanabhakdi). The total value of the three projects is THB4.5b, consisting of an acquisition value of THB1.4b and a development cost of THB3.1b. AWC expects to complete the acquisition by Dec-22, and all three projects are subject to shareholder approval. The source of funding for the projects is from financial institution loans.

Including the three projects above, AWC has 14 hotel projects in the pipeline from its current 17 operated hotels. The hotel room number should jump by 91% from 5,189 rooms in 2021 to almost 10,000 rooms by 2027, or equivalent to an 11% CAGR.

### Establishing an investment vehicle to invest in the hotel business

AWC announced the establishment of an investment vehicle to invest in the hotel business and in tourist attractions in Thailand. The total maximum investment value is approximately USD500m, (cTHB16.5b). AWC will invest approximately 15-60% of the total investment value and the remaining funds will come from domestic and international institutional investors.

This is a new asset light business model for AWC. It would get project development fees, management fees and a potential investment gain when divesting the asset. We have not yet factored this investment vehicle into our model, pending more information from AWC.

## 4Q21 results review

- AWC reported a 4Q21 core loss of THB304m, in line with our estimate but beating BBG's consensus estimate of a THB487m core loss. Including a THB1.6b gain on changes in the fair value of investment properties (THB1.3b after net tax), AWC booked a net profit of THB967m.
- Hospitality business: Hotel revenue grew 209% q-q in 4Q21 thanks to the relaxation of lockdown measures. The hotels that had strong signs of a recovery were Bangkok Marriott Hotel the Surawongse, Banyan Tree Krabi and Phuket Marriott Resort & Spa, Nai Yang Beach.
- Commercial business: Revenue grew 27% in 4Q21, driven mainly by the recovery of community shopping malls and community markets following the relaxation of lockdown measures. In addition, office tenants permitted their staff to work at the office, leading to higher revenue from office buildings.
- The EBITDA of operating assets (BU EBITDA) improved from THB72m in 3Q21 to THB514m in 4Q21, consisting of THB-11m from the hotel business, THB106m from the retail business and THB419m from office properties. Including corporate expenses, group EBITDA was THB285m in 4Q21 (vs a THB184m loss in 3Q21).
- AWC's 2021 core loss was THB2.2b, accounting for 92% of our 2021E core loss of THB2.5b.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
