BUY

UNCHANGED

Ebbing water and earnings in 4Q21

- 4Q21 NP of THB123m, (-90% q-q, +14.7x y-y) due to the lower NPs from its two hydropower plants.
- We project that NP will continue to grow y-y, given the higher electricity production level for XPCL on seasonally high water flows.
- Maintain BUY and our SoTP-based TP of THB6.6.

Weak 4Q21 results on lower earnings from XPCL

CKP posted a 4Q21 net profit (NP) of THB123m, down 90% q-q but up 14.7x y-y, significantly below our estimate by 25% and Bloomberg's consensus forecast by 150%, due to the lower NPs from its two hydropower plants, consisting of 1) a sharp NP drop from the 1.28GW Xayaburi (XPCL) hydropower plant, thanks to the seasonally lower average water levels in 4Q21; and 2) a higher electricity sales volume due to the higher water level in the reservoir of the 615MW Nam Ngum 2 (NN2) hydropower plant. 2021 net profit was THB2.2b (+438% y-y), driven by the y-y rises in NPs from XPCL and NN2. 2021 sales volumes for electricity increased 0.1% y-y to 3,412GWh. The EBITDA margin dropped to 29.6% in 4Q21, mainly from Bangpa-in Industrial SPP (BIC)'s weaker operations and margin due to the rising gas costs.

Stronger y-y in 2021 on higher water levels

The run-of-river XPCL saw a y-y higher sales volume at 7,305GWh (+16% y-y) due to the Mekong River's higher average seasonal water flows. This resulted in a share of profits of THB5b in 2021, up 305% y-y. NN2 saw a sharp rise in its electricity sales volume in 2021 to 1,845GWh, up 101% y-y, due to the water stored since 2020. The higher electricity production for NN2 should continue in 2022, given the large amount of water stored in its reservoir and the heavy rainfall in 2021. BIC saw a 0.5% y-y higher electricity sales volume at 1,544GWh but a 0.9% y-y decline in its steam sales volume due to weaker demand.

XPCL's net profit should rebound in 2022

In 2022, we project that CKP's NP will continue to grow y-y, based on a higher electricity production level for XPCL on seasonally high water flows, while the NP from BIC could increase due to higher demand from industrial users following the full economic reopening in Nov-21.

Hydropower is a key catalyst

We maintain BUY and our SoTP-based TP of THB6.6. We think CKP remains attractive as a key beneficiary of the strong NPs from its hydropower plants NN2 and XPCL.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 21-Feb-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
