Price cap and higher cost hurt 4Q21

- 4Q21 NP of THB19m (-65% q-q, -81% y-y) mainly due to the government price cap on diesel at THB28-30/litre since Oct-21.
- The government's excise tax cut by THB3/litre for three months (Feb-Apr 2022) should gradually boost the oil demand for SUSCO.
- Maintain BUY with our SoTP-based target price of THB3.50.

Higher cost and diesel price cap hurt 4Q21 results

SUSCO posted a weaker 4Q21 net profit (NP) of THB19m, down 65% q-q and 81% y-y, 20% below our estimate and 24% below Bloomberg's consensus estimate, mainly due to the government price cap on diesel at THB28-30/litre since Oct-21. The 4Q21 total sales volume rose to 246m litres (ml), driven by the economic reopening despite the ongoing Covid pandemic. EBITDA dropped to THB140m in 4Q21, down 24% q-q and 39% y-y, dragged down by higher costs. 4Q21 revenue jumped to THB6.1b, up 29% q-q and 54% y-y as a result of the higher average selling price (ASP) and higher sales volume.

Sales volumes improved across the board

4Q21 revenue from oil sales (excluding other non-operating income) amounted to THB5.98b, up 31% q-q and 55% y-y, driven by 1) a higher sales volume in Thailand, with domestic sales revenue of THB4.1b in 4Q21 (+42% q-q, +48% y-y) due to the economic reopening and higher ASP; 2) higher revenue from export oil sales to Myanmar (+123% q-q) and Cambodia (+8% q-q), which were partly offset by the lower revenue from export oil sales to Laos and China. SUSCO's 4Q21 sales volume was 246ml (+19% q-q, -2% y-y), up from 206ml in 3Q21 and 251ml in 4Q20, including higher oil sales volumes from oil station sales, wholesale sales, jet fuel sales, and export sales.

A strong recovery is in sight

We project SUSCO's NP to sharply recover in 2022 onward. The rising vaccination rate and the economic reopening, both domestically and globally, and the government's excise tax cut by THB3/litre for three months (Feb-Apr 2022) should gradually boost the oil demand for SUSCO's oil stations (diesel, gasoline), non-oil business (coffee), exports (jet fuel, gasoline, diesel) and aviation business (jet fuel).

An attractive play on economic reopening theme

We maintain BUY with our SoTP-based target price of THB3.50. We believe SUSCO is a unique and attractive downstream play in Thailand's energy sector thanks to its well-balanced business portfolio of earnings equally generated from its three units comprising oil stations, oil exports, and jet fuel sales, riding the expected demand recoveries in 2022-23.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
