## Hedging loss hurt 4Q21 results

- 4Q21 core NP was THB10.5b, up 22% q-q; 4Q21 NP was THB3.5b on a higher ASP to offset the weaker sales volume.
- We believe Banpu's share price will rerate in the next 12 months, based on the expectation of strong quarterly net profits.
- Maintain BUY and our SoTP-based TP of THB16.9.

### Hedging loss was larger than expected in 4Q21

4Q21 core net profit (NP) was THB10.5b, up 22% q-q and from a mere THB39m NP in 4Q20 – 12% below our estimate and 1% below BBG consensus. Including a USD209.6m non-recurring loss (mainly from a USD214.7m hedging loss), 4Q21 NP was THB3.5b, down 0.5% q-q. Coal operations improved markedly, driven by a higher average selling price (ASP) to offset the weaker sales volume. Coal NP from China was USD35.3m on a higher gross margin, while the China power unit posted a USD8m net loss. EBITDA rose to THB21.5b, up 23% q-q and 296% y-y due to the higher gross profits from the coal business on the higher ASP.

### ASP was a true hero

Coal sales volumes dipped to 8.11mt in 4Q21, down 7% y-y and 14% q-q. Sales volumes from Centennial Coal (CEY) dropped to 2.21mt (-28% y-y, -11% q-q) due to the complex geology at the Mandalong and Springvale mines. The coal sales volume in Indonesia was 5.3mt (-9% y-y, -10% q-q) due to heavy rainfall. The 4Q21 coal ASP rose to USD126.4/t (+141% y-y, +27% q-q) due to the 37% q-q higher ASP for PT Indo Tambangraya Megah Tbk (ITMG) to USD154.5/t vs the 15% q-q rise in coal cost in Indonesia to USD52.7/t on the higher diesel cost. CEY's ASP increased to AUD123/t (+60% y-y, +20% q-q), while the coal cost in Australia jumped to AUD116.58/t, up 32% q-q due to higher mining costs. The average coal GPM was 51% in 4Q21 due to the higher GPM for ITMG to offset CEY's weaker GPM.

### Shale gas operations improved

Sales volumes for shale gas increased to 62.5bcf in 4Q21, up 0.9% q-q but down 4.5% y-y, due to the incorporation of the Barnett shale area's sales volume of 50bcf. The ASP for gas jumped by 37% q-q to USD5.05/mcf vs the USD0.48/mcf cost, resulting in a higher GPM at 63% in 4Q21, up from 35% in 4Q20 and 53% in 3Q21.

### Top pick as a coal and gas play

Maintain BUY and our SoTP-based TP of THB16.9. We believe Banpu's share price will rerate in the next 12 months, based on the strong quarterly net profits that we think will beat the market's expectations and its greener and more sustainable earnings from EV and battery ventures.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 23-Feb-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
