## BUY

  
 UNCHANGED

## Government's margin cap hurt 4Q

- 4Q21 NL of THB88m, down from an NP of THB65m in 3Q21 and an NP of THB671m in 4Q20, dragged by a 10% q-q weaker MM.
- We expect a recovery in PTG's net profit in 1Q22, driven by a continued strong sales volume to 1.5b litres and a higher MM.
- Maintain our BUY rating and our SoTP-TP of THB18.3.

### Depressed marketing margin eroded 4Q21 results

PTG posted a poor 4Q21 net loss (NL) of THB88m, down from a net profit (NP) of THB65m in 3Q21 and an NP of THB671m in 4Q20, still above BBG's consensus estimate of a THB110m NL and our NL estimate of THB100m. 4Q21 earnings were dragged down by a 10% q-q weaker marketing margin (MM) of THB1.4/litre, down from THB1.7-1.8/litre in 3Q21 due to the government's diesel price cap policy of THB28-30/litre that was mismatched with PTG's high fixed cost per litre of THB1.45/litre and the higher oil cost. 4Q21 share of profits from biodiesel were THB47m, down 72% y-y on weak demand caused by the government's mandate to change from B7/B10 to B5 biodiesel. Oil sales volume rose q-q to 1,287m litres (ml) (-1.3% y-y, +16.4% q-q), mainly from its retail channel at 1,247ml (-1% y-y, +16.5% q-q), which accounted for over 90% of PTG's total sales volume, despite the 20 new stations added in 4Q21.

### Sales volume recovered sharply for oil and LPG

Revenue rose 36% y-y in 4Q21 to THB37.6b, driven by a higher retail oil price and a 14% q-q higher sales volume after the economic reopening. Gross profits from the non-oil businesses (LPG, food & beverages (F&B) and convenience stores), accounted for 21.9% of the total gross profit in 4Q21, comprising 9.5% from LPG sales to 102m litres (+46% q-q, +79% y-y), 4.8% from F&B, mainly from PunThai Coffee, and 7.6% from Max Mart convenience stores and other businesses.

### Net profit to gradually recover starting in 1Q22

We expect a recovery in PTG's net profit in 1Q22, driven by a continued strong sales volume to 1.5b litres and a higher MM in the range of THB1.7-1.8/litre in 1Q22 vs THB1.4/litre in 4Q21, given the government's THB2/litre cut to the diesel price due to the lower excise tax. As every THB0.1/litre higher MM could result in a THB0.1b net profit for PTG, based on our calculation, we think PTG's net profit in 1Q22 could see a q-q rise of up to THB0.2b-0.3b net profit.

### Best play on marketing margin rebound in 2022

We maintain our BUY rating and our SoTP-TP of THB18.3. We think the 4Q21 NL should mark the bottom, and believe PTG is on track to recover in 2022 on the back of higher demand and an improving MM.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

#### PTG Energy (PTG TB)

Date	Rating	Target price	Date	Rating	Target price	Date	Rating	Target price
22-Jul-2020	BUY	22.00	02-Aug-2021	BUY	18.80	08-Nov-2021	BUY	18.30
14-Jan-2021	BUY	24.50	02-Sep-2021	BUY	20.80			

Suwat Sinsadok, CFA, FRM, ERP started covering this stock from 22-Jul-2020

Price and TP are in local currency

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
PTG Energy	PTG TB	THB 14.30	BUY	The downside risks to our SoTP-based TP include 1) a government cap on oil prices; and 2) weaker demand for diesel and gasoline.

Source: FSSIA estimates

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 25-Feb-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
