## 1Q22 results beat average since 1Q18

- HMPRO posted a 1Q22 net profit of THB1.5b, up 11% y-y and down 15% q-q; 4.2% below Bloomberg's consensus estimate.
- Gross profit improved by 8% y-y to THB4.85b with a higher retail profit margin of 26%, while SG&A/sales narrowly rose y-y to 17.2%.
- We maintain BUY and our TP of THB18.3.

### 1Q22 net profit above 4-year average

HMPRO posted a 1Q22 net profit of THB1.5b, up 11% y-y and down 15% q-q; 4.2% below Bloomberg's consensus estimate. This was mainly due to higher product prices for consumers in relation to the Russia-Ukraine conflict. The strong 1Q22 net profit of THB1.5b, a quarterly high above the 4-year average by 8.1%, has proven that HMPRO's net profit is resilient thanks to the company's cost control and product mix strategy.

### Sales grew 4.7% y-y in 1Q22 from two supporting events

In 1Q22, there were two key events to help promote retail sales, which grew by 4.7% y-y. The two events were: 1) the government's stimulus program, "Shopping and Payback" (Shop Dee Me Kuen), which ran during 1 Jan to 15 Feb-22 and offered personal income tax deductions for spending of up to THB30,000 on variable products and services; and 2) the HomePro Electric Expo during 11-20 Mar-22. Total revenue rose 5.3% y-y in 1Q22 with the addition of higher rental and service income.

### Better product mix helped offset higher SG&A expenses

HMPRO's 1Q22 gross profit improved by 8% y-y to THB4.85b with a higher retail profit margin of 26% due to the product mix with a higher direct sourcing proportion to 20.4%. SG&A expenses increased by 6.8% y-y and the SG&A to sales ratio narrowly rose y-y to 17.2% from 1Q21's 17.0% due to the expenses associated with employee welfare related to Covid-19 and marketing.

### Patience is required for potential outperformance in 2H22

We maintain BUY and our TP of THB18.3 based on 37.5x 2022E P/E, a slight discount to its 5-year average, to reflect the weak SSSG in the near term. We think SSSG will improve by 2H22, driven by higher domestic spending and the full return of tourism.

## Investment thesis

HMPRO is the leading player in the home improvement sector, with a c22% market share based on revenue of THB62b in 2020. Despite the slowdown in the property sector in 2018-20, HMPRO has continued to deliver double-digit earnings growth, even though new-home customers have declined from 50% of total customers to about 20% (2015-20). Sales to renovation customers have grown to c50% currently, which are more sustainable, in our view. Moreover, about 30% of total customers are contractors, which should benefit from government spending.

## Company profile

HMPRO is a home-improvement product seller that targets the mid- to high-end segment. From 2013, it started to expand aggressively, both with its HomePro stores and in the budget segment with its Mega Home stores. It also expanded to Malaysia by setting up a store around the end of 2014.

## Catalysts

Potential catalysts include the faster-than-expected turnaround of overseas operations, a better-than-expected macro outlook in Thailand, and a higher proportion of house brands to drive its gross profit margin (GPM).

## Risks to our call

The key downside risks to our DCF-based TP include: 1) lower-than-expected SSSG; 2) the slow recovery of tourist numbers; and 3) operating losses from its overseas business.

## Earnings sensitivity

- For every 1% increase in SSSG we estimate 2022 EPS would rise 1%, and vice versa, all else being equal.
- For every 0.1% increase in GPM we estimate 2022 EPS would rise 1.1%, and vice versa, all else being equal.
- For every 0.1% increase in SG&A to sales we estimate 2022 EPS would fall 1.1%, and vice versa, all else being equal.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
