### A decent, improving quarterly net profit in 1Q22

SCGP reported a 1Q22 net profit of THB1.66b, down 22% q-q and 22% y-y; 3% below our expectation and 2% below BBG's consensus estimate. Excluding non-operating items, core net profit improved to THB1.72b in 1Q22, up 27% q-q but down 24% y-y. The key driver was the 35% y-y higher revenue from its integrated packaging chain (IPC) to THB31b, driven by higher post-pandemic demand and the consolidation of mergers and partnerships (M&P). The revenue from its fibrous unit (FC) jumped to THB6.2b in 1Q22 (+18% q-q, +32% y-y), driven by the higher demand for printing and writing papers and foodservice packaging after the economic reopening.

### Revenue up but EBITDA down in 1Q22

Revenue from IPC continued to grow in 1Q22 to THB31b, up 35% y-y, while IPC EBITDA dropped by 8% y-y to THB4.3b due to the rising costs of freight and raw materials, resulting in a lower IPC EBITDA margin of 14% in 1Q22, down from 20% in 1Q21. FC revenue improved by 32% y-y to THB6.2b, while its EBITDA inched up 4% y-y to THB0.6b despite a lower EBITDA margin of 10% in 1Q22, down from 34% in 4Q21, due to rising costs that were partly offset by the higher demand for printing and writing papers and rising utilisation rates. The overall EBITDA margin, excluding other businesses, was lower at 10% in 1Q22, with the lower IPC EBITDA margin of 14% and FC's EBITDA margin of 10% resulting from China's lockdown and the ongoing logistics problems.

### Growth and improvement to continue in 2Q22

We believe SCGP's net profit will continue to improve in 2Q22 onward, driven by 1) capacity growth and operational integration from its M&P strategy; 2) operational efficiency improvement; 3) a demand recovery post economic reopening; and 4) lower old corrugated cardboard costs. However, we expect the impact of the higher coal and gas prices to erode SCGP's EBITDA margin by 0.5-1%.

### EBITDA improvement should continue

Maintain BUY and our TP of THB70, based on 16.1x 2022E EV/EBITDA – a valuation premium to its peers due to SCGP's stronger net profit growth outlook on the back of improving demand and benefits from M&P.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
