## Recovery is on track

- Booked a smaller core loss of THB288m (+52% y-y, +5% q-q) in 1Q22; EBITDA of each business unit has turned positive.
- International tourists to drive RevPAR to reach pre-Covid level by the end of this year.
- Maintain BUY with 2022 DCF-based TP of THB6.0/shr.

### AWC reported a 1Q22 core loss of THB288m, in line with estimate

Including a THB1.2b gain on changes in the fair value of investment properties (THB0.9b after net tax), AWC booked a net profit of THB645m in 1Q22. Hotel revenue grew 13% q-q thanks to the relaxation of lockdown measures and the country reopening. The OCC rate improved from 29% in 4Q21 to 35% in 1Q22. Retail and commercial revenue grew 5% q-q, driven mainly by the recovery of community shopping malls and community markets on relaxed lockdown measures. 1Q22 office building revenue was relatively flat q-q. The rental rate slightly increased by 6% q-q due to lower discounts to tenants. EBITDA of operating assets (BU EBITDA) slightly improved from THB514m in 4Q21 to THB530m in 1Q21, consisting of THB20m from the hotel business, THB104m from retail and THB406m from office buildings. Including corporate expenses, group EBITDA was THB286m in 1Q22 (relatively flat q-q vs THB285 in 4Q21).

### RevPAR recovery momentum to continue throughout this year

At the analyst meeting on 11 May, management guided that the recovery of its hotel operations should continue in 2Q22. RevPAR has ramped up from THB1,180 in Jan to THB1,492 in Mar, and is likely to reach cTHB2,000 in Apr, driven by the recovery of international tourists. The OCC rate has had a similar trend, increasing from 30% in Jan to 41% in Mar. International customers accounted for 17% in terms of the OCC rate in Jan, and gradually increased to 22% in Mar. Management expects RevPAR to reach the pre-Covid level (cTHB3,700) by end-2022.

### Core operations to turn profitable in 2022

We expect AWC's core profit (excluding fair value gain) to turn profitable in 2022. The hotel OCC rate should jump from 20% in 2021 to 40-50%, while the retail OCC rate should increase from 54% in 2021 to 60%. We expect the EBITDA margin to jump from 1% in 2021 to 33% in 2022, premised on the strong flow-through ratio of 67% for the hotel business and 97-110% for the retail and office building business.

### Strong earnings growth over next three years

AWC trades at an attractive valuation of 34x 2023E P/E (including fair value gain of THB2.0b-3.0b p.a.), while offering strong expected earnings growth of 29% CAGR over 2019-25. The short-term catalyst would be the recovery of international tourists, especially high-spending tourists.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Asset World Corp	AWC TB	THB 4.84	BUY	Downside risks to our DCF-based target price include 1) extraordinary events such as political turmoil and natural disasters; 2) a higher hotel room supply, which may result in price competition; and 3) the slower-than-expected recovery of international tourist numbers.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 11-May-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
