Hemp hope sweetens outlook

- 1Q22 core NP was THB253m, down 44% q-q and 47% y-y, due to the y-y lower earnings from its solar and wind farms.
- We think GUNKUL is poised to see a new earnings growth phase in 2022 onward, driven by the COD of its cannabis value chain.
- Maintain BUY and our SoTP-based TP of THB8.1.

Weaker operations across all units in 1Q22

GUNKUL's 1Q22 net profit (NP) of THB503m dropped 0.9% q-q and 17% y-y due to the weaker revenues from its trading, power, and construction units. 1Q22 core NP was THB253m, down 44% q-q and 47% y-y, missing our forecast by 10% and BBG's consensus estimate by 13%, due to the y-y lower earnings from its solar and wind farms. Gross profits dropped q-q across the board, led by engineering, procurement & construction (EPC) at THB55m (-71% q-q), power at THB513m (-37% q-q), trading at THB60m (-29% q-q), and maintenance services at THB38m (-10% q-q). Interest expenses dipped by 0.7% q-q to THB244m due to lower interest expenses for new projects.

Poor wind farm production hurt 1Q22 EBITDA

1Q22 EBITDA was THB845m, (-27% q-q, -17% y-y). The EBITDA margin dropped to 42.4% in 1Q22, down from 43% in 4Q21 and 49.9% in 1Q21, due to the lower production at its wind farms caused by the monsoon season, which reduced electricity production to 28.5m kWh in 1Q22.

Extraction license to boost hemp growth phase

We think GUNKUL is poised to see a new earnings growth phase in 2022 onward, driven by the commencement of the staggered operating dates for its hemp and cannabis value chain business units, including farming, extraction, and sales and marketing of both upstream hemp and cannabis leaves, flowers, and seed oil, and the value-added end products of food, beverages, medicines, health food, snacks, and candies. In 2Q22, GUNKUL's subsidiary G.K. Bio Extraction expects to secure a CBD extraction license from the Food and Drug Administration before launching an operation to produce CBD for cosmetics and herbal medicines.

Hemp growth upside is now around the corner

We maintain BUY and our SoTP-based TP of THB8.1. We expect 2022-23 NP growth from EPC and hemp and cannabis farming to be GUNKUL's key earnings growth drivers on top of its strong power business cash cow. We think its hemp venture is likely to become a successful business, with the first crop harvested in Mar-22.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 11-May-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
