- TASCO should see stronger q-q NPs in 2022, backed by a lower crude cost, a higher sales volume and lower freight costs in 2022.
- Maintain BUY and our TP of THB22.5.

Weak 1Q22 earnings on lower sales volume

TASCO posted a 1Q22 net profit (NP) of THB216m, down 61% q-q and 49% y-y. The company had a 1Q22 core NP of THB185m, down 63% q-q and 78% y-y, missing the Bloomberg consensus by 33% and our estimate by 22%. We believe the lower core NP was due to a lower sales volume, particularly for its retail sales which command a higher gross margin than wholesale exports, and y-y lower product margins due to the higher crude price and lower crude consumption from Venezuela, resulting in a weaker asphalt-Dubai margin in 1Q22. As the higher crude cost rose at a faster rate than the rise in the asphalt price due to lower demand amid China's lockdowns and higher freight costs, we estimate that TASCO had an asphalt sales volume of 0.24mt in 1Q22, down 11% q-q, accounting for 18% of the 2022 sales volume target of 1.3mt set by the company.

Weak margin on higher crude cost

TASCO's EBITDA margin plunged to 6.6% in 1Q22, down from 13.3% in 1Q21 but up from 5.3% in 4Q21, due to the lower asphalt-crude margin and lower asphalt sales in the domestic market. We estimate that the non-recurring items in 1Q22 included a hedging loss and an FX gain. TASCO's 1Q22 interest expense was lower by 22% q-q to THB20m due to lower debt.

Recovery is likely in 2Q22 onward

We believe TASCO should see a stronger q-q NP in 2022, backed by: 1) a lower crude cost due to the rising supply; 2) a higher sales volume driven by the higher budget for the Thai government during fiscal year 2022 (Oct-21 to Sep-22); 3) lower freight costs in 2022, as the shipping industry should return to normalcy after the global economic reopening; and 4) higher sales volumes from retail sales.

Still an attractive play on asphalt demand recovery

We maintain BUY and our TP of THB22.5, based on 10.6x 2022E EV/EBITDA. We believe its crude supply risk remains low and the logistics challenges caused by the Covid-19 pandemic should subside in 2022, allowing TASCO to boost its retail sales and export volumes.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
