Results were weaker than expected

- BEC's 1Q22 core earnings were lower than expected, falling to THB146m (-61% q-q, +3% y-y).
- Weak TV adex pressures BEC's short-term outlook.
- Maintain BUY with the same TP of THB18.60.

Weaker-than-expected 1Q22 results

BEC reported 1Q22 core earnings at THB146m (-61% q-q, +3% y-y), lower than our expectation of THB170m. Its 1Q22 net profit at THB174m included an impairment loss reversal of THB28m. TV revenue dropped to THB1.1b (-20% q-q, -7% y-y). This was weaker than our expectation and fell faster than overall TV advertising expenditure (adex), which was down only 10% q-q and 4% y-y. The company's advertising rate declined both q-q and y-y to THB80k/min with a utilisation rate of 64%. Total revenue decreased by 22% q-q and 5% y-y to THB1,241m in 1Q22, its lowest revenue in the past seven quarters.

Cost management still doing well

Although BEC posted weak 1Q22 results due to a slowdown in its TV revenue, the company was still able to rein in its costs. GPM stood at 29.5% vs 25.6% in 1Q22 due to lower drama and foreign content amortisation due to its cost control policy, despite an increase in first-run drama content.

Short-term pain but long-term gain

BEC's 1Q22 earnings contributed only 14% of our full-year forecast, and 2Q22 earnings are likely to be weak also due to the weak economic outlook. However, we believe earnings should improve starting from 2H22 based on potential upcoming content sales and the recovery in TV adex in line with the resurgent Thai economy. Moreover, with the expectation that the Covid situation should also improve, BEC's event business should resume generating revenue for the first time in two years and give a boost to the company's earnings going forward.

Maintain BUY with the same TP of THB18.60

We believe the recovery projected in the coming quarters offers the potential for BEC to achieve solid growth this year. We maintain BUY with the same TP of THB18.60, pegged to 35x 2022E P/E (+1SD of its mean P/E). We think that the downside on BEC's share price is now very limited, with the maximum downside on our TP at only THB15.4, based on our 10% estimate for an earnings downside in 2022 of THB1,067m and pegged to 32x (+0.5SD of its mean P/E) – even lower than The One Enterprise (ONEE TB, BUY, TP THB14), our top pick, which is pegged to 33x P/E.

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

RECOMMENDATION STRUCTURE**Stock ratings**

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
