## THAILAND / UTILITIES - CONVENTIONAL

# BUY

UNCHANGED

## Visible and sanguine growth ahead

- We expect BGRIM to see a gradual decline in its gas cost, from THB441.6/mmbtu in 1Q22 down to THB400/mmbtu by end-2022.
- BGRIM also plans to enter into data centre, energy management, and smart grid ventures via a JV with TRUE.
- Maintain BUY and our SoTP-based TP of THB44.

### Four positive developments to catalyse earnings

During BGRIM's post-1Q22 results call, management indicated four key positives for its earnings outlook in 2Q22 onward. First, the gas cost should gradually drop in 2H22 on rising domestic gas supplies and LNG imports. Second, the installed capacity growth plan remains sanguine to reach 7.2GW by 2025, up from 3.5GW in 1Q22. Third, the upsides from the upcoming seven small power producers (SPP) under SPP replacement power purchase agreements (PPAs) – with over 80% of the 360MW capacity now secured for industrial users in 2H22-2023 – remain on track to drive up earnings by over THB1b annually, based on our estimate. Fourth, BGRIM is entering a new growth engine in Industry 4.0.

### Widening gross margins for SPPs on rising Ft and lower gas cost

We expect BGRIM to see a gradual decline in its gas cost, from THB441.6/mmbtu in 1Q22 down to THB400/mmbtu by end-2022, potentially widening the gross margins for SPPs thanks to the projected higher electricity tariff on the higher fuel tariff (Ft) by THB0.2338/kWh in May-22, with an additional THB0.2-0.3/kWh in Sep to Dec-22 likely. Plus, BGRIM plans to import 0.5mt of LNG in 1Q23 to replace 15% of its gas consumption for 21 operating SPPs, potentially saving 7-10% in gas cost.

### Growth engines from both power plants and power infrastructure

BGRIM plans to grow its renewable and conventional power capacity. Renewable capacity growth with a high EIRR of 12-18% for solar and wind farms is planned to come from South Korea, Japan, Vietnam, Malaysia, Indonesia, the Philippines, and Australia, with over 1GW of potential capacity growth from hydropower in Laos. Conventional power capacity growth could come from Vietnam under the soon-to-announce PDP 8 within Jun-22, including the 2-3GW LNG-to-power plant with an EIRR of 10-12%, based on our estimate. BGRIM also plans to leverage its strength in electricity infrastructure, entering into data centre, energy management, and smart grid ventures via a JV with TRUE.

### Accumulate ahead of earnings recovery

Maintain BUY and our SoTP-based TP of THB44. We think BGRIM's 1Q22 net profit of THB34m on the high gas cost will be its bottom quarter, and is now poised to recover to THB0.5-0.8b a quarter by 4Q23.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
B.Grimm Power	BGRIM TB	THB 33.25	BUY	The downside risks to our SoTP-based TP include 1) lower-than-expected demand for electricity in Thailand, 2) a lower crude price, and 3) unplanned shutdowns of its SPPs.
True Corporation	TRUE TB	THB 4.50	HOLD	The key upside and downside risks to our DCF-based TP are if the 5G subscription gains and ARPU are better or worse than our expectation, if the company can reduce its costs better or worse than we expect, and if there is a faster or slower-than-expected adoption of 5G use cases.

### Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finasia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finasia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 24-May-2022 unless otherwise stated.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
