New move; limited short-term impact

- KBANK will acquire 57.51% of BMAS (investment cost THB7.6b). We read the acquisition as neutral in the short term due to the limited impact to KBANK's performance. In the longer term, we are optimistic as it opens up opportunities for KBANK to penetrate the high-growth Indonesian market.

Acquiring 57.51% of PT Bank Maspion Indonesia

On 30 May-22, KBANK announced that KASIKORN Vision (KVF), its wholly-owned subsidiary, will acquire a 57.51% holding in PT Bank Maspion Indonesia (BMAS IJ) – KVF will buy an additional 30.01% stake in BMAS, then BMAS will issue a rights offering for KBANK – with a total investment fund not exceeding USD220m, or THB7.6b. KBANK currently holds 9.99% in BMAS. After completion, KBANK and KVF will altogether hold not less than 67.50% in BMAS. After the transaction is done, BMAS' capital should amount to a minimum of THB7.0b. The transaction is expected to be finalised by the end of 2022.

Neutral view in short term due to insignificant impact to KBANK

We read this deal as neutral in the short term due to the insignificant impact to KBANK's performance. KBANK's 2022 net profit and capital ratio from this deal should be minimally impacted due to the small net profit and asset size of BMAS vs KBANK, in our view. BMAS' 2021 asset size and loan portfolio size were at THB33b and THB19b, respectively. Its 2021 net profit amounted to THB179m. Therefore, we maintain our current 2022 net profit and tier 1 ratio forecasts of THB41.5b (+9.2% y-y) and 16.9%, respectively. Based on our calculation, KBANK will acquire a 57.51% holding in BMAS for a value of around 4.2x 2021 P/BV, with BMAS' ROE of 6% in 2021. We think the reason behind the expensive acquisition price is that KBANK wants to retain BMAS' banking license, as Indonesia's financial services authority (OJK) has issued a regulation that increases the core capital requirement for banks to RUPIAH3t or THB7.0b by 2022 from RUPIAH100b previously.

Long-term benefit to enlarge KBANK's growth

In the longer term, however, we are optimistic on the BMAS deal as it opens up opportunities for KBANK to penetrate the high-growth Indonesian market. According to KBANK, it will utilise BMAS to facilitate its Thai clients who want to invest in Indonesia. As BMAS is part of the Maspion group of companies, we also think that KBANK might utilise Maspion group clients to enlarge its business.

Maintain BUY with 2022 GGM-based TP of THB180

We maintain our GGM-based TP of THB180. We believe KBANK's net profit and ROE will increase continuously. We also think it is in full swing to transform itself to unlock its value and increase shareholder returns.

Investment thesis

We maintain our BUY call, as we believe that the extension of the relaxed loan classification and provision setup rules will give the bank more time to deal with its trouble debts.

Moreover, once the Covid-19 dust has settled, we expect KBANK to post sustainable long-term growth, as it has laid a strong foundation for such. First, KBANK has been heavily investing in digital platforms for more than a decade – we believe it will utilise its digital platform to generate more revenue while reducing operating and funding costs. Second, KBANK is one of the first movers to have expanded into the Asean Economic Community +3. Therefore, its digital investment and international expansion should be a game changer, helping it to become a regional digital bank.

Company profile

Established on 8 June 1945, Kasikornbank was listed on the Stock Exchange of Thailand in 1976. At the end of 2021, KBANK operated 839 branches, down from 860 in 2021 and 10,991 ATMs, up from 10,911 in 2020. In addition, the bank has an international network that includes 16 establishments in eight countries.

Catalysts

Potential share price catalysts for KBANK include:

- Lower credit cost from fewer new NPLs;
- Faster expansion in the digital lending space than expected;
- The return of foreign fund flows into the Thai stock market.

Risks to our call

Downside risks to our GGM-based TP are 1) prolonged economic sluggishness and further waves of the Covid-19 pandemic affecting loan growth and asset quality; and 2) the impact of further interest rate cuts on NIM and potential new regulations from the Bank of Thailand on debt-servicing programs.

Acquiring 57.51% of PT Bank Maspion Indonesia

On 30 May-22, KBANK announced that KASIKORN Vision (KVF), its wholly-owned subsidiary, has entered into a Conditional Sale and Purchase Agreement to become the major shareholder of PT Bank Maspion Indonesia (BMAS IJ), wherein KVF will conduct a transaction within an investment fund not exceeding USD220m, or THB7.6b. In this regard, such a share acquisition will be completed when approvals are granted by the related authorities. This transaction is expected to be finalised by the end of 2022.

As for the acquisition, KVF will buy an additional 30.01% stake in BMAS, which will increase KBANK group's shareholding to 40.00% from the 9.99% the bank has held since 2017. After that, KVF will purchase additional shares via a rights offering to increase the shareholding of KBANK's group in BMAS to 67.50%. After the transaction is done, BMAS' capital should amount to a minimum of THB7.0b. Such a transaction will not allow KBANK to make a tender offer for BMAS' remaining shares.

Neutral view in short term due to insignificant impact to KBANK

We read this deal as neutral in the short term due to the insignificant impact to KBANK's performance. KBANK's 2022 net profit and capital ratio from this deal should be minimally impacted due to the small net profit and asset size of BMAS vs KBANK, in our view. BMAS' 2021 asset size and loan portfolio size were at THB33b (0.8% of KBANK's 2021 asset size) and THB19b (0.8% of KBANK's 2021 loan volume), respectively. Its 2021 net profit amounted to THB179m (0.5% of KBANK's 2021 net profit), increasing 33% y-y. Therefore, we maintain our current 2022 net profit and tier 1 ratio forecasts of THB41.5b (+9.2% y-y) and 16.9%, respectively

Based on our calculation, KBANK will acquire 57.51% in BMAS for a value of around 4.2x 2021 P/BV, with BMAS' ROE of 6% in 2021, compared to 1.8x 9M19 P/BV when Bangkok Bank (BBL TB, HOLD, TP THB134) acquired Permata Bank (BNLI IJ), with BNLI's ROE of 5% in 2018. We think the reason behind the expensive acquisition price is that KBANK wants to retain BMAS' banking license, as Indonesia's financial services authority (OJK) has issued a regulation that increases the core capital requirement for banks to RUPIAH3t or THB7.0b by 2022 from RUPIAH100b previously as part of a long-term plan to streamline hundreds of Indonesia's small commercial lenders and upscale their businesses with capital injections, mergers, or acquisitions.

Based on our calculation, KBANK will buy the 30.01% stake in BMAS for around RUPIAH1,200 per share, equal to 0.4x 2021 P/BV. This part would have an investment value of cTHB3.7b. Then, the remaining THB3.9b would be in the rights issue.

To recap, BNLI, which is 99% owned by BBL, is around 16x bigger than BMAS in terms of asset size and loan portfolio. In 2021, BNLI's asset size and loan volume were at cTHB547b and cTHB300b, respectively. BNLI's 2021 net profit was THB2.8b, with an ROE of 2.9%.

Exhibit 2: Comparing BMAS and KBANK's key financial data

	----- BMAS -----		----- KBANK -----		----- % BMAS to KBANK -----	
	2020 (THB m)	2021 (THB m)	2020 (THB m)	2021 (THB m)	2020 (%)	2021 (%)
Loan	14,879	19,199	2,244,821	2,421,813	0.66	0.79
Asset	21,778	33,197	3,658,798	4,103,399	0.60	0.81
Deposit	17,675	27,996	2,344,998	2,598,630	0.75	1.08
Equity	2,766	3,105	491,286	536,675	0.56	0.58
Net profit	144	179	29,487	38,053	0.49	0.47

Sources: Bloomberg; FSSIA's compilation

In the longer term, however, we are optimistic on the BMAS deal as it opens up opportunities for KBANK to penetrate the Indonesian market, which is a fast-growing international market and the largest economy in the region. According to KBANK, it will utilise BMAS to facilitate its Thai clients who want to invest in Indonesia. As BMAS is part of the Maspion group of companies, which operates in various business groups like consumer products, consumer industrial products, construction and building materials, and hotels, etc., we think that KBANK might also utilise Maspion group's clients to enlarge its business.

We think that growing its presence in Indonesia is in line with KBANK's target to operate in numerous Asian markets. Apart from Indonesia, KBANK also has offices in Vietnam and Myanmar, and branches in Laos and Cambodia. In 2020, it acquired a 35% stake in Myanmar's Ayeyarwaddy Farmers Development Bank.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Company	Ticker	Price	Rating	Valuation & Risks
Kasikornbank	KBANK TB	THB 146.50	BUY	Downside risks to our GGM-based TP are 1) prolonged economic sluggishness and further waves of the Covid-19 pandemic affecting loan growth and asset quality; and 2) the impact of further interest rate cuts on NIM and potential new regulations from the Bank of Thailand on debt-servicing programs.
Bangkok Bank	BBL TB	THB 129.50	HOLD	Downside risks to our GGM-based TP are 1) prolonged economic sluggishness and further waves of the Covid-19 pandemic affecting loan growth and asset quality; and 2) the impact of further interest rate cuts on its NIM and potential new regulations from the Bank of Thailand on debt-servicing programs. The upside risk would be better-than-expected synergies with Permata.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 27-May-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
