THAILAND / PETROCHEM & CHEMICALS

IVL TB

BUY

## Time for chemical growth roadster

- We see upsides to our NP forecasts in 2022-24, driven by higher margins for longer plus an EBITDA upside from IOD.
- We believe the gas and LNG price hikes in IVL's western market will benefit the company's EBITDA.
- Maintain BUY and our TP of THB70.

### More upsides and visibility for earnings growth in 2022

We see upsides to our net profit forecasts in 2022-24, driven by three factors. First, we anticipate higher margins for longer for integrated PET-PTA, MTBE, and particularly surfactants, which have commanded high margins due to the tight supply and strong demand. Second, we estimate the EBITDA upside from integrated oxides and derivatives (IOD) to be larger than our previous expectation due to the strong margins of PO, surfactants, and ethanolamine, which should more than offset the margin weakness of MEG and the weak demand for MEG and fibres (lifestyle) due to China's lockdowns. Third, the downside from the energy price hikes should be more than offset by the higher product margins. We project an additional gas cost of USD25m for production in North America on the higher Henry Hub gas price, and €35m for production in the EU.

### Geopolitical risk: a boon or bane to IVL?

We believe the gas and LNG price hikes in IVL's western market (North America and the EU), due to the rising supply risk from Russia's invasion of Ukraine, will benefit IVL's EBITDA, considering that 1) IVL has small EBITDA exposure to the EU market at 13% of total EBITDA in 2022E; 2) the higher gas cost in the US has resulted in much higher margins for the IOD downstream products of surfactants, in which IVL significantly boosted its capacity from the acquisition of IOD assets from Huntsman in 2019 and Oxiteno in 1Q22; and 3) the higher import parity differential between North America, the EU, and Asia, due to the higher cost of freight and duties, has more than offset the higher energy costs for IVL.

### Expect a solid 2Q22 net profit over the THB10b mark again

With additional drivers in the form of margin upsides for PET-PTA, MTBE, and surfactants, a 10% q-q projected higher volume to 3.9mt, and higher IOD EBITDA, mainly from Oxiteno (+USD50m a quarter based on our estimate), we project a 2Q22 net profit in the range of THB10b-14b.

### Top pick in Thai petrochemical sector

Maintain BUY and our TP of THB70, based on 9.4x 2022E EV/EBITDA, still a discount to its historical average, to reflect the weak MEG margin. We think IVL's EPS in 2022 could beat our and the BBG consensus' EPS forecasts, potentially catapulting its share price in 2022.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
