## Industrial estate titan ready to run

- We confirmed our positive view on WHA's NP outlook in 2022 due to the improvement in its sales of land in Thailand and Vietnam.
- We think WHA's overall non-IE earnings should still grow y-y, driven by stronger y-y earnings from utilities (water and power).
- Maintain BUY and our SoTP-based TP of 4.4.

### Strong and visible earnings growth momentum ahead

From the conference presentation by Mr. Natthapatt Tanboon-eak, CFO of WHA, on "Thailand Virtual Investors Day" on 8 Jun-22, we confirmed our positive view on WHA's net profit outlook in 2022 at THB3.3b, slightly higher than its pre-Covid net profit of THB3.2b in 2019. Significant improvement in its sales of land at industrial estates (IE) in Thailand and Vietnam should contribute over THB2b EBT to WHA in 2022, based on our estimate.

### IE growth likely to exceed 1,250-rai target in 2022

Management indicated that as of Apr-22, WHA had already secured over 1,000 rai of land sales and is highly confident that the company could beat its 1,250-rai target in 2022. In addition, with the higher proportion of its land sales in IEs, we expect WHA to book a higher net profit from its IE unit given 1) the higher average selling prices of land in IEs in Thailand at THB3.5m per rai vs THB2.5m per rai for land sales outside IEs and in Vietnam's IEs; and 2) the EBT margin of land sales in IEs in Thailand would be c50% or THB1.75m per rai, a higher value than the EBT margin of 60% for non-IE land and IEs in Vietnam at THB1.5m per rai (60% of the THB2.5m selling price). We think future growth in data centres and EV businesses could mean more IE clients for WHA.

### Non-IE units could see improving earnings in 2022

While the logistics unit may contribute slightly lower y-y earnings at THB0.2b due to the lower number of equity assets to be monetised into REITs and property funds, we think WHA's overall non-IE earnings should still grow y-y, driven by stronger y-y earnings from utilities (water) amid the post-Covid demand recovery and new demand from industrial users (+30,800 m3/day), and the improving earnings from power on the capacity growth of rooftop solar installations.

### An attractive play on the EEC, FDI, and EV boom

Maintain BUY and our SoTP-based TP of THB4.4. We think WHA remains an overlooked IE play as a key beneficiary of the projected strong demand growth for land sales in IEs under the Eastern Economic Corridor (EEC) campaign, the EV industry investment boom in Thailand, and the return of FDI to Thailand post the economic reopening.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
