## Adopting 'challenger bank DNA'

- We have a neutral view on KBANK's three-year plan for a THB100b investment in 1) IT and M&A deals; and 2) an expansion of its client base to include more small ticket retail clients.
- Over the short to medium term, we think its cost to income might increase, but long term, this should enhance its ROE.
- Maintain BUY at 2023 GGM-based of TP THB192.

### Neutral view on latest strategic transformation strategy

On 11 July 2022, KBANK announced a three-year plan to "adopt challenger bank DNA" and invest THB100b to transform the way it runs its business. This strategic program is aimed at 1) IT investment and further M&A deals; and 2) an expansion of its client base to include the unbanked and underbanked as well as very small businesses and the self-employed. In the short to medium term, as this investment should be booked as both OPEX and CAPEX, its cost to income from 2023 onward might increase. Nevertheless, we expect the plan to help KBANK expand its client base into the small retail segment, which should enhance its revenue and ROE. We read this move as neutral until more specific details and timelines are provided.

### THB100b IT budget to expand client base, improve operations

The THB100b budget includes 1) THB22b in new technology and IT systems over the next two years, in addition to the THB12.7b invested over the past two years; 2) THB30b for two to five M&A deals and partnerships in technology-related businesses within the next 12 months; and 3) another THB50b for potentially more IT investments and M&A deals, which the bank has not announced yet. We believe the bank has sufficient cash flow and access to capital to support its investment plans.

### Three more new projects and one expansion

As part of its THB100b investment and "challenger bank" transformation, KBANK will offer new lending programs such as 1) Buy Now Pay Later for the self-employed; 2) a fairer, shorter loan approval process for SMEs; and 3) provide uncollateralised credit for small store operators upcountry. Also, KBANK wants to expand its current business, LINE BK, and increase the total value of LINE BK loans outstanding to THB20b by the end of 2022, up from THB18b currently.

### Maintain BUY for the potential to unlock shareholder value

We maintain our BUY call and 2023 GGM-based TP of THB192 as we believe KBANK's net profit and ROE should increase continuously. KBANK's transformation is now in full swing and should unlock its value and increase shareholder returns, in our view.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
