THAILAND / UTILITIES - CONVENTIONAL

BUY
UNCHANGED

From everything's wrong to right

- BGRIM's gas-fired SPP Laemchabang 1, with a total capacity of 140MW, has commenced its COD on 16 July 2022.
- In 3Q22 onward, we think the margins for BGRIM's electricity sold to IUs over the gas cost will gradually improve in 1Q22.
- Maintain BUY and our SoTP-based TP of THB44.

Showtime for a new SPP with SPP replacement PPA

According to Khaohoon on 18 July 2022, BGRIM's gas-fired small power producer (SPP) Laemchabang 1 (LCB1), with a total capacity of 140MW, has commenced its commercial operation date (COD) on 16 July 2022. Located in Laemchabang industrial estate in Chonburi, in the Eastern Economic Corridor (EEC), LCB1 is the first SPP project under the SPP replacement power purchase agreement (PPA) (SPPR) with a 30MW electricity volume sold to the Electricity Generating Authority of Thailand (EGAT), down from 90MW under the previous SPP PPAs. The remaining 110MW capacity will be marketed to industrial users (IU).

A series of five SPPs with SPP replacement PPAs in 2H22

BGRIM's five SPPRs, including LCB1, will sell 30MW of electricity to EGAT and the remaining 90-110MW capacity will be sold to IUs in three industrial estates, all located in the EEC. The CODs of the second and third SPPRs (ABP1 & 2) with a total equity capacity of 142MW (owned 51% by BGRIM) will be in Sep-22 and the fourth and fifth SPPRs will be in Dec-22. This will potentially catalyse BGRIM's net profit recovery in 2H22 and growth in 2023 onward, given their high energy efficiency to save gas costs by up to 15%, high portions of electricity and steam sales volumes to IUs, and the pent-up demand for IUs in industrial estates.

Margins to expand despite higher global spot LNG price

In 3Q22 onward, we think the margins for BGRIM's electricity sold to IUs over the gas cost will gradually improve from the bottom in 1Q22. The sharp rise in the fuel tariff and the grid electricity price by at least 17% (+THB0.6866/kWh to THB4.7/kWh), forced by EGAT's currently ballooning losses from the electricity price subsidies, should more than offset the gas cost of THB430-450/mmbtu, thanks to the higher gas production levels from the low-price gas fields of Bongkot and Erawan to 1,200-1,400mmscfd (27-31% of Thailand's gas supply in 2022E), and BGRIM's import of low-price contract LNG.

Higher pricing power, lower cost, and capacity growth

Maintain BUY and our SoTP-based TP of THB44. BGRIM is now our top pick in the Thai power sector based on its strong and visible earnings recovery in 2H22 and growth in 2023 onward.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of June 24, 2019) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 18-Jul-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
