## High dividend and net profit growth

- Outperforming 2Q22 NP at THB2b beats BBG consensus and our forecast by 8%, due to solid loan growth and strong asset quality.
- Expect a continued surge y-y in KKP's 3Q22 net profit.
- Maintain BUY with a 2023 GGM-based TP of THB82.

### 2Q22 NP outperforms due to better-than-expected ECL

KKP reported an outperforming 2Q22 net profit of THB2,033m (+50% y-y, -1% q-q), beating the Bloomberg consensus estimate and our forecast by 8% thanks to a better expected credit loss (ECL) than anticipated. Its 1H22 net profit accounts for 54% of our 2022 net profit forecast.

### Solid loan growth and strong asset quality drove 2Q22 net profit

KKP's 2Q22 operations were solid, driven by 1) a 2.9% q-q rise in loan volume due largely to a rise in its hire purchase and housing loans; and 2) a significantly lower ECL due to its sufficient provision cushion and efficient asset quality control. Its non-performing loans (NPLs) rose by 8% q-q, with a high coverage ratio remaining at 169%. These positives were able to offset a 14% y-y and 22% q-q plunge in its non-NII due mainly to a drop in brokerage and IB fees amid reduced capital market activity. Losses on repossessed cars increased q-q after the abnormal lows seen in 1Q22. Accordingly, our concern on this point is limited as losses on repossessed cars remained manageable, in our view.

### Attractive net profit growth should continue in 3Q22

We expect KKP to post strong net profit growth y-y in 3Q22 (down slightly q-q), supported by 1) its continued outstanding NII following a projected rise in its loan volume; 2) an increase in its fee income from the IB deal; and 3) lower losses from repossessed car sales due to solid demand for used cars. We believe these positives should completely offset a gradual rise in its cost of funds from potential rate hikes.

### Expect a high dividend and strong performance; maintain BUY

We maintain BUY with a 2023 GGM-based TP of THB82. We think the recent drop in KKP's share price is due to investors' concerns over the potentially greater NIM squeeze from future rate hikes. We think this provides an opportunity to accumulate, based on our view that its bottom line is well-cushioned by solid fee income, strong loan growth, and a lower ECL. Also, we expect KKP to provide a 2022 dividend yield of 7%, with an estimated 2% 1H22 dividend yield.

### Investment thesis

KKP is a modest commercial banking operation whose main portfolio includes hire purchase lending. The bank commands a medium-sized c5-6% market share in auto hire purchase lending. Moreover, KKP has a solid capital market arm, Phatra Securities PLC (PHATRA, not listed), under Phatra Capital (100% owned by KKP). PHATRA is prominent in investment banking (IB), financial advisory (FA), institutional securities brokerage, and the growing private banking business. In our opinion, KKP's dominant institutional brokerage position, plus its IB and FA businesses, should help it to generate more sustainable performance.

### Company profile

KKP was created through the merger of a commercial banking business driven by Kiatnakin Bank and a capital market business led by Phatra Capital and Phatra Securities. KKP's banking operations are mostly geared toward retail, with auto hire purchase lending accounting for 51% of its loan portfolio at end-2021.

### Catalysts

Potential share price catalysts for KKP include:

- A higher dividend payout;
- Higher fee income, especially from Phatra;
- An increase in revenues related to the equity market.

### Risks to our call

Downside risks to our GGM-based target price include weakening asset quality and lower fee income.

## Solid loan growth and strong asset quality drove 2Q22 net profit

KKP reported an outperforming 2Q22 net profit of THB2,033m (+50% y-y, -1% q-q), beating the Bloomberg consensus estimate and our forecast by 8% thanks to a better-than-expected ECL. Its 2Q22 operations were solid, driven by 1) a 2.9% q-q loan volume increase due largely to a rise in its hire purchase and housing loans; and 2) a significantly lower ECL due to its sufficient provision cushion and efficient asset quality control. Its non-performing loans (NPLs) rose by 8% q-q, with a high coverage ratio remaining at 169%. These positives were able to offset a 14% y-y and 22% q-q plunge in its non-NII due mainly to a drop in brokerage and IB fees thanks to the reduced capital market activity. Losses on repossessed cars increased q-q after the abnormally low level seen in 1Q22. Accordingly, our concern on this point is limited as losses on repossessed cars remained manageable, in our view.

### 2Q22 key highlights

- Total loan volume increased by 2.9% q-q (19% y-y) from an increase in hire purchase and housing loans. Its new car lending penetration rate for the first five months of 2022 remained high at 5.5% vs TISCO's 4.6%, due mainly to its expansion into new business segments with higher asset quality.
- NIM fell slightly to 4.08% from 4.16% in 1Q22 due to low-risk loan expansion.
- Non-NII dropped by 14% y-y and 22% q-q due to lower fee income and a net gain on financial instruments designated at fair value through profit or loss.
- Losses from repossessed car sales amounted to THB332m in 2Q22 vs THB273m in 1Q22 and THB425m in 2Q21. The loss ratio per car was still in good shape.
- Its 2Q22 coverage ratio remained at a high level of 169%.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
