# A decelerating car

- We expect SAT's earnings in 2Q22 to slow down to THB203m (-22% q-q, -15% y-y), mainly due to pressure from the steel price.
- Revising earnings estimate for this year down by 5% to THB967m due to GPM estimate cut.
- Downgrade to HOLD with a new 2023 TP of THB19.50.

## Expect a slowdown in 2Q22 earnings

We believe SAT's revenue in 2Q22 will grow by 7% y-y to THB2.18b (-6% q-q) and continue to beat the industry – as Thailand's car production grew by only 3% in 2Q22 – thanks to the new orders that started mass production in the quarter. However, due to the low season and the rising steel price, we expect the company's GPM to drop to 16.3% in 2Q22 vs 19.4% in 2Q21 and 17.9% in 1Q22. Moreover, its share of profits from associates will also likely slow due to the semiconductor shortage. As a result, we expect SAT's earnings in 2Q22 to fall to THB203m (-22% q-q, -15% y-y).

## Car production target revision doesn't impact SAT's revenue

Although we revise our 2022 target for Thailand's car production down from 1.8m units to 1.68m units, we still have a positive view on SAT's revenue thanks to its new orders. We increase our revenue estimate for SAT this year by 2% to THB9.4b (+9% y-y).

#### Earnings estimate cuts due to the rising steel price

We cut our core net profit assumptions in 2022/23 down by 5%/13% to THB967m/THB1b. This is mainly due to the GPM that we expect to stay at a low level throughout this year and next. The company anticipates that the steel price is still in an uptrend. SAT indicated that it might need almost 12 months in order to pass through the costs to its customers, which is a longer time than we had expected. We had previously expected that the company would be able to completely pass through its costs to customers within this year. As a result, we expect that SAT's GPM for 2022/23 should fall to 18%/18.4% vs our previous expectation of 18.6%/19.4%.

## Downgrade to HOLD with a new 2023 TP of THB19.50

We downgrade our recommendation on SAT to HOLD from Buy, with a new 2023 TP of THB19.50 pegged to 8x P/E (-0.5SD of its mean). The company will likely be pressured by the slowdown in car production and the rising steel price, which could increase the risk and uncertainty for 2H22. SAT's 2022E earnings growth at only 1% y-y is less attractive than its peers. In our opinion, the only key investment highlight for SAT is its status as a high dividend play that offers a dividend yield of over 8% p.a.

#### Investment thesis

SAT is the largest producer of axle shafts (76% market share), which are used in the manufacturing of one-tonne pickup trucks and large commercial cars.

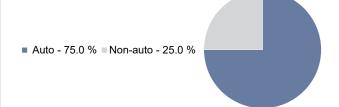

SAT is the safest company in the automotive sector, in our view, as it has no debt and holds more than THB2.5b in cash, equal to THB6 per share. The company has a solid earnings outlook, as Thailand's automobile manufacturing industry is one of the largest drivers of the country's economy. The demand for new cars in Thailand has consistently remained at 0.8m-1m units per year, according to historical data. Therefore, when the economy returns to normal, we expect Thailand's automobile production volume to also return to its normal level in 2023, which would directly benefit SAT.

# Company profile

SAT manufactures parts for the motor vehicle industry. These parts are for: passenger cars, pickup trucks, and the agricultural industry. Its major customers are original equipment manufacturers (OEMs) on long-term purchase contracts, as well as the replacement equipment manufacturer (REM) segment.

## **Catalysts**

- The expectation that its earnings should reach another all-time high in 2022;
- Solid dividend yield track record at 5-7% p.a.

# **Key assumptions**

	2021	2022E	2023E	2024E
Car production growth (%)	18	(0.1)	4.1	6.2
Kubota tractor growth (%)	43	(6)	5	5

# Risks to our call

The key downside and upside risks to our P/E-based TP are the domestic car manufacturing industry recovering slower or faster than expected, a faster-than-expected adoption rate for electric vehicles in Thailand, higher raw material prices, and worse global demand for pickup trucks.

#### Earnings sensitivity

- For every 1% increase in auto parts revenue, we project 2022 earnings to rise by 0.6%, and vice versa, all else being equal.
- For every 1 bp increase in gross profit margin, we project 2022 earnings to rise by 1.2%, and vice versa, all else being equal.

Declared This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

#### Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## **RECOMMENDATION STRUCTURE**

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as (target price\* - current price) / current price.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
