## Reaching a higher growth roadmap

- We project a solid 2Q22 NP of THB120m (+14% q-q, +56% y-y) due to demand recoveries and new product launches.
- In 3Q22 onward, we expect SNNP to see stronger revenues from both the domestic and overseas markets.
- Maintain BUY and our TP of THB20.

### Another solid quarter with 2Q22E net profit of THB120m

We project SNNP to post a solid 2Q22 net profit of THB120m, up 14% q-q and 56% y-y, the second highest quarterly net profit after its record high of THB121m in 4Q21. Operations should improve both in the domestic and overseas markets, with strong revenue and a higher sales volume due to demand recoveries and new product launches, including the new hemp drink and the mini-JELE jelly snack.

### Expect record high revenue in 2Q22

We project SNNP's 2Q22 revenue to reach a record high at THB1.2b, up 8% q-q and 15% y-y. Key drivers are the strong sales volumes of new products and a solid export sales volume to Vietnam thanks to the improving availability of containers after the severe shortage in 1Q22. In 3Q22 onward, we expect SNNP to see stronger revenues from both the domestic and overseas markets, particularly in Vietnam where SNNP is scheduled to commence the operation of its new production plant with estimated annual revenue of THB0.7b.

### Softer 2Q22E margin mostly on one-time expenses

We expect SNNP's gross margin to decline slightly q-q to 26.3% in 2Q22, down from 27% in 1Q22, as a result of the labor shortage during the Songkran period which led to higher overtime expenses, and the initial expense related to the ramp-up of the production capacity for the hemp drink. SNNP expanded from 1,500 containers per annum (cpa) to 7,000cpa to serve the much stronger-than-expected demand in Thailand. We project the SG&A to sales ratio to rise to 10.7% in 2Q22, up from 9.9% in 1Q22 due to the higher fuel cost, but we expect the ratio to soften to 10% in 2H22 as SNNP is now streamlining its logistics costs.

### Ready to grow

We maintain BUY and our TP of THB20, based on 37x 2022E P/E. We think SNNP is well positioned to capture the strong revenue growth from its new products and the rising utilisation rate at its new production plant in Vietnam, which we estimate to rise to 50% by end-2022 vs the 30% breakeven level. Vietnam and Cambodia are SNNP's two major overseas markets, with revenue contributions of c10% for Vietnam and c7% for Cambodia. We project overseas revenue growth of 10-20% y-y in 2022.

## Investment thesis

As one of Thailand's leading producers and distributors of snacks and jelly, with three highly recognised brands – 'Bento' (squid and fish strips), 'Jele' (jelly), and 'Lotus' (biscuit sticks), Srinaporn Marketing (SNNP) has been an iconic snack market leader in Thailand over the past three decades. After three years of restructuring efforts in 2018-20, we think SNNP will now reap the benefits from higher net margins, rising sales volumes, and improving operational and distribution efficiency. Unlike other snacks, which have seen demand sharply dwindle after a few years due to health concerns and high prices, we think SNNP's seafood snacks and jelly products are "core snacks", which have seen consistent demand growth in the past three decades.

## Company profile

Founded in 1972 by the Kraipisitkul family as a snack wholesaler under the name Sriwivat, SNNP has been operating for more than 30 years and is currently a market leader with strong brands in snack and beverage products.

## Catalysts

Potential catalysts are 1) revenue growth driven by higher utilisation rates and the new production plant in Vietnam (COD in 2022); and 2) a net margin rise from 2.1% in 2020 to 9.1-10.2% in 2021-23, driven by lower SG&A and interest expenses, along with higher sales volumes from traditional trade, rising from 48% in 2020 to 52% of the total sales volume in 2023, based on our estimate.

## Risks to our call

The key downside risks to our DCF-based TP are 1) slower-than-expected demand growth and market penetration overseas, especially in Cambodia and Vietnam; 2) a lower-than-expected profit margin due to high raw material and transportation costs; and 3) higher-than-expected SG&A expenses from overseas operations.

## Earnings sensitivity

- For every 1% increase in utilisation rate, we estimate that 2022 earnings would rise by 2.4%, and vice versa, all else being equal.
- For every 1% increase in THB/USD, we estimate that 2022 earnings would rise by 1.7%, and vice versa, all else being equal.
- For every 1% increase in electricity tariff, we estimate that 2022 earnings would drop by 0.2%, and vice versa, all else being equal.

Company	Ticker	Price	Rating	Valuation & Risks
Srinanaporn Marketing	SNNP TB	THB 15.70	BUY	The key downside risks to our DCF-based TP are 1) slower-than-expected demand growth and market penetration overseas, especially in Cambodia and Vietnam; 2) a lower-than-expected profit margin due to high raw material and transportation costs; and 3) higher-than-expected SG&A expenses from overseas operations.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
