## One of the best GRM plays

- SPRC has proven its ability to survive and grow amid the highly volatile refinery industry margin cycles.
- We project a strong 2Q22 NP of THB9.5b; core NP should reach THB6.6b, driven mainly by the hefty gasoline-Dubai margin.
- Maintain BUY and raise our TP from THB14.

### Pure refinery play is beautiful

As a leading refiner in the Thai energy sector, SPRC has proven its ability to survive and grow amid the highly volatile refinery industry margin cycles. Its low cost structure, highly flexible operational capability to respond to changes in refinery product yields and crude mix, and sound capital management should allow SPRC to fully capture the current industry GRM strength without compromising on hedging losses and other non-refinery losses.

### Expect a strong 2Q22 net profit of THB9.5b

In 2Q22, we project SPRC to post a strong net profit of THB9.5b, up 79% q-q and 1,124% y-y. Excluding inventory gains, SPRC's core net profit in 2Q22 should reach THB6.6b, up 206% q-q and 2.8x y-y. Key drivers are the sharp rise in the market GRM to USD23/bbl, driven mainly by the hefty gasoline-Dubai margin to over USD40/bbl in 2Q22; 2) lower-than-peers' crude premiums; and 3) a higher projected utilisation rate to 98% thank to the strong domestic demand and high product margins.

### Higher GRM peak in 4Q22 than 2Q22 is highly likely

With the rising diesel-Dubai margin that we project to exceed USD40/bbl in 4Q22 vs the current USD30/bbl as of 3 Aug-22, driven by both seasonal demand as a heating oil and as a substitute fuel for gas to produce power in Europe in this coming winter, we think SPRC's GRM could rise again to even surpass the recent peak level of USD23/bbl in 2Q22.

### EPS revisions and TP upgrade to THB14.6

We maintain BUY and raise our TP from THB14, previously based on 4.8x 2022E EV/EBITDA, to THB14.6, now based on 4.1x 2023E EV/EBITDA, to reflect our upward EPS forecast revisions by 0.5-110% to incorporate the impacts arising from our assumptions of higher oil prices, higher market GRMs on higher margins of gasoline, diesel and jet-Dubai, and rising crude premiums. We believe SPRC could be an attractive dividend play in the Thai equity market, given its strong earnings and cash flow generation in 2022, which should not only turn its negative retained earnings positive but also allow SPRC to have a high dividend payout for its 2022 operations, for which we estimate a 3.4% yield.

## Investment thesis

With IMO 2020 coming into force in Jan 2020 – limiting the sulphur content in fuel oil used by the shipping industry – we think SPRC faces a potential downside risk from a lower fuel oil-Dubai spread, but this should be offset by a widening diesel-fuel oil spread. While purely a refinery business, SPRC's earnings sustainability comes from its low cost structure, high crude flexibility and high operational efficiency, supported by its parent, Chevron.

We think SPRC's earnings will continue to grow in 2022-23, driven by sustainable earnings from a higher market gross refining margin (GRM) and its low cost structure

## Company profile

SPRC is a subsidiary of US-based Chevron, with capacity of 165kb/d. Its competitive, low cost structure and high crude consumption flexibility are key to sustaining its high market GRM.

## Major shareholders

## Catalysts

Higher refinery utilisation rates and a higher market GRM are key potential earnings drivers.

## Risks to our call

TP is based on EV/EBITDA. Downside risks are a sharp rise in oil price and weak demand for refined oil products.

## Earnings sensitivity

- For every 1% increase in average Dubai oil price, we project that 2022 earnings would rise by 2.8%, and vice versa, all else being equal.
- For every 1% increase in market GRM, we project that 2022 earnings would rise by 2.5%, and vice versa, all else being equal.
- Stability in crude oil price, rising diesel cracks and low crude premiums are key for earnings growth.

**Disclaimer:**

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

## RECOMMENDATION STRUCTURE

### Stock ratings

Stock ratings are based on absolute upside or downside, which we define as  $(\text{target price}^* - \text{current price}) / \text{current price}$ .

**BUY (B).** The upside is 10% or more.

**HOLD (H).** The upside or downside is less than 10%.

**REDUCE (R).** The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

\* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

### Industry Recommendations

**Overweight.** The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

**Neutral.** The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

**Underweight.** The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

### Country (Strategy) Recommendations

**Overweight (O).** Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Neutral (N).** Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

**Underweight (U).** Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
