A solid 2Q22 as expected

ASIAN reported a strong 2Q22 net profit of THB264m, 2% below Bloomberg's consensus estimate and 5% below our forecast. The key drivers were the pet food (PF) and tuna units, which saw their revenues grow by 44% y-y and 23% y-y, respectively, to offset the sharp drop in revenue from aquafeed by 39% y-y as a result of the company's restructuring and the weaker demand from customers. The gross margin rose q-q to 19.7% in 2Q22, up from 16.8% in 1Q22 but lower than 20.7% in 2Q21 due to the weak margin of the aquafeed unit.

Pet food is now the true star for ASIAN

PF revenue jumped to THB1.6b, up 44% y-y, with a 12% y-y higher sales volume to 10kt. PF revenue accounted for 56% of ASIAN's total revenue in 2Q22, up from 44% in 2Q21. We estimate PF's 2Q22 net profit at THB0.1b-0.2b thanks to rising canned pet food sales, which contributed 44% of the total PF sales volume. PF's "Monchou" premium pet food brand and "Hajiko" mass-market dog food brand have been successfully rebranded, boosting strong revenue growth in 2Q22.

Aquafeed was ASIAN's Achilles' heel

Tuna revenue grew 23% y-y in 2Q22, with a sales volume of 1.35kt. The Middle East is ASIAN's main market for tuna, accounting for 83% of its total revenue in 2Q22. The frozen food sales volume grew 3% y-y to 3.6kt, driven by higher sales volumes of squid to European markets in the HORECA segment. The value-added frozen sales volume climbed by 21% y-y, mostly due to higher demand from the US market. Meanwhile, aquafeed was ASIAN's Achilles' heel, with revenue plunging by 39% y-y to THB246m as a result of the drop in fish feed and shrimp feed sales volumes due to client portfolio adjustment and the lack of an increase in farm volume.

Strong BUY with a TP of THB24.7

We maintain BUY and our TP of THB24.7. We think ASIAN is one of Thailand's most attractive food exporters with strong earnings growth from its crown jewel pet food unit, followed by tuna and frozen food, that should offset the weaker earnings from the aquafeed business. ASIAN announced an interim dividend of THB0.25/share for its 1H22 operations.

Company	Ticker	Price	Rating	Valuation & Risks
Asian Sea Corporation	ASIAN TB	THB 16.60	BUY	Downside risks to our P/E-based TP would be 1) a stronger-than-expected THB against USD; and 2) the high volatility of raw material prices, such as tuna and squid prices, which could hurt its GPM.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.
