THAILAND / DIVERSIFIED FINANCIALS

HOLD

Muted catalysts in the short term

- Feeble 2Q22 NP of THB19m due to NPLs and OPEX.
- Bottomed in 2Q22, but slow recovery ahead in 3Q22, in our view.
- Maintain HOLD call as we see muted catalysts for driving its performance and share price in the short term.

NPLs and OPEX led to a weak 2Q22 performance

MICRO delivered a feeble net profit in 2Q22 at THB19m (-63% y-y, -64% q-q), which was lower than our expectation of THB27m due to a higher expected credit loss (ECL). The weak performance came from 1) a significant increase in its ECL by 99% y-y, 96% q-q, following a substantial increase in its NPLs by 31% q-q, implying an NPL ratio of 4.58% from 3.85% in 1Q22; and 2) a noticeable rise in its OPEX by 68% y-y, 27% q-q due mainly to its branch expansion, the setting up of a new subsidiary, Micro Plus Leasing, and debt collection expenses. Such negative factors were able to completely drown out its strong operating income growth of 26% y-y, 6% q-q following solid loan growth. MICRO's loan volume surged 45% y-y, 10% q-q due to higher demand for used trucks and from gaining more market share from local competitors. Its 1H22 net profit accounts for 37% of our 2022 net profit forecast.

High energy prices, rising inflation led to asset deterioration

Due to its retail segment orientation, we think MICRO faces more negative impacts from high energy prices and high inflation as MICRO's debtors must wait three to six months before they can pass the higher energy cost burden on to their clients. We think this is slowing down the ability of MICRO's debtors to repay their debts. Thus, its NPLs went up substantially in 2Q22. Also, the number of seized vehicles rose to 160 units in the second quarter.

Slow recovery expected in 3Q22

We believe MICRO's earnings bottomed out in 2Q22 and expect that its 3Q22 performance should reflect a slow recovery, with net profit bouncing back minimally q-q from a lower ECL as asset quality problems slightly improve q-q due to seasonality and lower energy prices. However, we think its net profit should continue to fall y-y, dragged down by higher y-y ECL, a rise in its OPEX from setting up its subsidiary Micro Plus Leasing and higher debt collection expenses.

Maintain HOLD with a 2023 GGM-based TP of THB5.5

We maintain our HOLD call on MICRO with an unchanged 2023 TP of THB5.5. We see muted catalysts for driving its performance and share price in the short term. We think its performance should get back on track in 1Q23. At that time, we might put it back in our basket.

NPLs and OPEX led to a weak 2Q22 performance

MICRO delivered a feeble net profit in 2Q22 at THB19m (-63% y-y, -64% q-q), which was lower than our expectation of THB27m due to a higher ECL. The weak performance came from 1) a significant increase in its ECL by 99% y-y and 96% q-q, following a substantial increase in its non-performing loans (NPLs) by 31% q-q, implying an NPL ratio of 4.58% from 3.85% in 1Q22; and 2) a noticeable rise in its OPEX by 68% y-y and 27% q-q due mainly to its branch expansion, the setting up of a new subsidiary, Micro Plus Leasing, and debt collection expenses. Such negative factors were able to completely drown out its strong operating income growth of 26% y-y and 6% q-q following solid loan growth. MICRO's loan volume surged 45% y-y and 10% q-q due to higher demand for used trucks and from gaining more market share from smaller local competitors.

2Q22 key highlights

- MICRO posted outstanding loan growth of 45% y-y and 10% q-q due to the high demand for used trucks. According to the Department of Land Transport, the number of registered used trucks in 2Q22 was at 8.7k units, slightly below 1Q22 by 1.6%, but still at a high level. Also, MICRO was able to successfully compete for market share with local competitors due to its branch expansion.
- Its NIM declined to 12.3% from 12.9% in 1Q22 as the company lent more towards newer truck models, which command a lower yield than older trucks.
- Cost to income rose to 43.6% in 2Q22 from its six-branch expansion, the setting up of Micro Plus Leasing, and debt collection expenses.
- Its NPLs jumped significantly by 78% y-y and 31% q-q. We think the debt repayment ability of MICRO's clients is being negatively affected by high inflation and energy prices.

Level	
Certified	This level indicates practical participation with thoroughly examination in relation to the recommended procedures from the audit committee or the SEC's certified auditor, being a certified member of Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) or already passed examination to ensure independence from external parties.
Declared	This level indicates determination to participate in the Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC)

Disclaimer:

The disclosure of the Anti-Corruption Progress Indicators of a listed company on the Stock Exchange of Thailand, which is assessed by Thaipat Institute, is made in order to comply with the policy and sustainable development plan for the listed companies of the Office of the Securities and Exchange Commission. Thaipat Institute made this assessment based on the information received from the listed company, as stipulated in the form for the assessment of Anti-corruption which refers to the Annual Registration Statement (Form 56-1), Annual Report (Form 56-2), or other relevant documents or reports of such listed company. The assessment result is therefore made from the perspective of Thaipat Institute that is a third party. It is not an assessment of operation and is not based on any inside information. Since this assessment is only the assessment result as of the date appearing in the assessment result, it may be changed after that date or when there is any change to the relevant information. Nevertheless, FSS International Investment Advisory Company Limited does not confirm, verify, or certify the accuracy and completeness of the assessment results.

Note: Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of 26 October 2021) are categorised into: 1) companies that have declared their intention to join CAC, and; 2) companies certified by CAC.

Source: FSSIA estimates

Company	Ticker	Price	Rating	Valuation & Risks
Micro Leasing	MICRO TB	THB 5.50	HOLD	Downside risks to our GGM-derived TP include 1) an economic slowdown, especially for logistics activities and private investment; 2) deteriorating asset quality; and 3) higher-than-expected policy rate hikes. Upside risks include 1) efficient asset quality control; and 2) the faster ramping up of its new businesses, including new motorcycle hire purchase loans, truck title loans, and insurance brokerage

Additional Disclosures

Target price history, stock price charts, valuation and risk details, and equity rating histories applicable to each company rated in this report is available in our most recently published reports. You can contact the analyst named on the front of this note or your representative at Finansia Syrus Securities Public Company Limited

FSSIA may incorporate the recommendations and target prices of companies currently covered by FSS Research into equity research reports, denoted by an 'FSS' before the recommendation. FSS Research is part of Finansia Syrus Securities Public Company Limited, which is the parent company of FSSIA.

All share prices are as at market close on 08-Aug-2022 unless otherwise stated.

RECOMMENDATION STRUCTURE

Stock ratings

Stock ratings are based on absolute upside or downside, which we define as $(\text{target price}^* - \text{current price}) / \text{current price}$.

BUY (B). The upside is 10% or more.

HOLD (H). The upside or downside is less than 10%.

REDUCE (R). The downside is 10% or more.

Unless otherwise specified, these recommendations are set with a 12-month horizon. Thus, it is possible that future price volatility may cause a temporary mismatch between upside/downside for a stock based on market price and the formal recommendation.

* In most cases, the target price will equal the analyst's assessment of the current fair value of the stock. However, if the analyst doesn't think the market will reassess the stock over the specified time horizon due to a lack of events or catalysts, then the target price may differ from fair value. In most cases, therefore, our recommendation is an assessment of the mismatch between current market price and our assessment of current fair value.

Industry Recommendations

Overweight. The analyst expects the fundamental conditions of the sector to be positive over the next 12 months.

Neutral. The analyst expects the fundamental conditions of the sector to be maintained over the next 12 months.

Underweight. The analyst expects the fundamental conditions of the sector to be negative over the next 12 months.

Country (Strategy) Recommendations

Overweight (O). Over the next 12 months, the analyst expects the market to score positively on two or more of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Neutral (N). Over the next 12 months, the analyst expects the market to score positively on one of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.

Underweight (U). Over the next 12 months, the analyst does not expect the market to score positively on any of the criteria used to determine market recommendations: index returns relative to the regional benchmark, index sharpe ratio relative to the regional benchmark and index returns relative to the market cost of equity.
